Educating Generations

THE QUINTER SOCIETY

Membership in the Juniata College Quinter Society is limited to those benefactors whose annual giving has reached \$5,000 or more a year. Quinterians become permanent members of the Society when their lifetime giving equals or exceeds \$100,000.

This special society is named for Juniata's first president. James Quinter was a leader in the educational reform movement of the Brethren Church in the second half of the 19th century. The founding of the Brethren Normal School in Huntingdon in 1876 fulfilled a vision that he had cherished for many years. When Jacob Zuck's untimely death threatened the continued existence of the school, Quinter's leadership assured the founders that the fledgling Normal School would carry on to become Juniata College.

In addition to invitations to special Quinter Society evenings, members receive a distinctive gold lapel pin, inscription of the names of the permanent Quinter Society members on a plaque to be mounted in the foyer of Ellis College Center, and prominent listing in the annual report of the President.

The president and trustees of Juniata College extend their thanks and wish to give special recognition to the following members of the Quinter Society.

Mr. and Mrs. William H. Agnew
 Mr. and Mrs. Edward J. Anderson
 Dr. and Mrs. John C. Baker '17
 Mrs. Beulah K. Baugher

Juniata College is an independent, privately supported coeducational institution committed to providing a liberal arts education to qualified students regardless of sex, race, religion, creed, color or handicap. Its policies comply with requirements of Title VIII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and all other applicable federal, state and local statutes, regulations and guidelines.

On the cover: Senior Betsy Reed of Saxton, is a fine representative of the elementary education students at the College.

EDUCATION STUDIES UNIQUE AT JUNIATA COLLEGE

There is more to being a teacher than just teaching reading, writing and arithmetic, at least at Juniata College that's what education students learn.

A career in education is more challenging today than ever before. Today's educator goes beyond merely passing on factual information. Since the world is changing so rapidly, with facts accumulating at an ever-increasing pace, today's educator must help today's student *learn* how to learn. A teacher today must be flexible, creative, dedicated and sensitive to the needs of young people.

From the large demand for early education and child care to the variety of adult and continuing education programs, the job of an educator is becoming an increasingly diverse and important one. Facts must be learned, of course, but so must motivational techniques and communication skills. At Juniata, students preparing to be teachers combine in-class learning with a wide variety of field experience. What is learned in the college classroom is applied immediately to the basic education classroom with content ranging from early childhood development to computer applications. The focus at Juniata is on creating a set of dispositions and a range of skills which prepare future teachers for the multi-faceted job of educating America's children.

The Juniata College Education Department is approved by the Pennsylvania Department of Education to prepare candidates for certification in early childhood education, elementary education, or secondary education. In the latter, academic majors include biology, chemistry, mathematics, earth and space science, English, foreign languages, physics and social studies. Secondary education students major in their field of study and take education courses required for certification.

Students who are working on certification take a set of required courses, and a variety of elective courses which allow them to understand current issues in education, to evaluate student performance and to strengthen interpersonal skills. Many of the courses have field experience components and the course of study culminates in a semester of student teaching.

The Education Department believes that students who are interested in teaching need direct experiences in the field. Juniata's education curriculum is designed to give students that early exposure. According to Dr. Fay Glosenger, chairperson of the Education Department, "One of the features that makes Juniata's Education Department attractive is the field placement program. From the time students are freshmen they are out in the community schools observing kids and working with teachers." All freshman education students work directly with children in the Early Childhood Center (see separate story), as well as with students in public schools. Students continue to expand field experiences each year by working in a variety of classroom settings. "All education students start off with a strong foundation in early childhood development, using the Center as a lab. We move them on through adolescent development and on to elementary, middle school or secondary settings depending on where their interest lies. Our Juniata students get the chance to explore a variety of educational settings including day care, special education and different grade levels. So with our extensive field placement, they can try education in a variety of settings as they develop a designated or individual POE," said Dr. Glosenger.

As juniors, all Juniata students have the opportunity to

study abroad and many education students take advantage of this program. Students may study in France, Germany, Spain, England, China or Japan. The British Infant School and the school system in England have been very popular in attracting education students. In the final step of preparing to become teachers, senior students complete a semester of student teaching.

As the department is committed to guiding prospective teachers in meeting the needs of individual children, so the highly qualified faculty members are committed to meeting the needs of the Juniata students. Many students take advantage of the opportunity for designing a course for independent study. Recent examples of these individual courses are Censorship of Children's Literature, Administration and Supervision of Early Childhood Education, Practicum in Speech Therapy, Storytelling, and Working with the Exceptional Child.

The Education Department believes that the variety and extent of the field opportunities at Juniata are unique and certainly represent a significant strength of the program. Experiences which have been arranged for on an individual basis have included leading a children's story hour on radio or story hours at the public library, working in the children's literature section of a bookstore, assisting in a local day care center and Head Start program, working with handicapped children in the Easter Seals swimming program, and working with language specialists from the Intermediate Unit. According to department members, educators at the state level are continually emphasizing the importance of field work and classroom observation, and while many colleges and universities send juniors and seniors into the classroom, Juniata students are there from the time they enter school in the fall of their freshman year.

In addition to practicum experiences for course credit, students in the Education Department have become involved in leadership roles with scout troops, Big Brother-Big Sister, Special Friends, and Special Olympics (which for three years has been hosted by Juniata). This past summer a new summer camp program for gifted students was developed by Dr. Glosenger and Jeff Coppes, a local teacher of the gifted. The program, entitled *New Visions*, involves college faculty,

Matt Gibson, a sophomore education student, identifies the parts of a flower for a special education class at Huntingdon Area High School.

public school teachers, and Education Department students (see separate story). The students work as instructional assistants in the classrooms and as counselors in recreational activities and residential hall life. Finally, the education club, Juniata Instructors of the Future, affords students the opportunity to discuss educational issues at a level different from that of the classroom.

Juniata students have access to excellent support facilities to assist in their learning process. In addition to six full-time faculty members and a field placement supervisor, students have access to an excellent curriculum library, a human interaction lab, and an Early Childhood Education Center.

The Early Childhood Center is a laboratory preschool located on campus. It serves the college by providing a model program in which students can observe and interact with children between the ages of 16 months and six years. The human interaction laboratory is equipped with a viewing room and video equipment to allow for demonstration and critiques of lessons. The department recently acquired a camcorder to tape student teachers. These tapes will be used as graduates interview for jobs.

The curriculum library, located on the third floor of Good Hall, offers many students opportunities to explore the design and critique of curricula. The library contains texts, books and materials in the areas of reading and language arts; history, geography, and social studies; science and mathematics; foreign languages; and methods of teaching for early childhood, elementary and secondary certification areas. In addition to books and other reference materials, the curriculum library houses three Apple IIE computers and a printer and one IBM microcomputer to be used by education students. The department has mathematics, and language arts software and is in the process of developing an extensive educational software library.

In addition to the excellent facilities and innovative, dedicated faculty, Juniata students receive quality personal attention. Class size ranges from 8 to 25 students, and unlike many other schools, student teachers are seen once a week for observation and conferences. "Our students know coming in that they are going to get lots of support from us. Student teachers work at least one semester with their cooperating

Sophomore Reann Fredericks treated her first graders at the Alfarata Elementary School to a special visit with exchange student Takako Namura from Japan, and Frederic Deloizy, a visiting instructor from France.

teachers before beginning the full-time student teaching process and we are always there for them when they need us," said Dr. Glosenger.

According to Dr. Glosenger there is going to be a tremendous shortage of teachers in all disciplines over the next decade. She feels that it is imperative to continue to attract quality students to the field. She said, "this department is aware of the situation facing public schools in the future, and we are keeping that in mind as we begin to plan for Juniata's future. At a time when overall enrollment in colleges and universities is decreasing, enrollment numbers in our department have doubled over the past two years.

"Students who want to teach are selecting Juniata because they want an opportunity to apply theory and practice skills. They know that they are going to be in a classroom right away, starting with observation, moving through tutorial type tasks and working right up to the point where they take full control of the classroom and student teach. That is very appealing and somewhat unique," said Dr. Glosenger.

"We see our students mature over four years. They start out thinking that they want to teach because they love kids. Then they find out how demanding it is and there is a change in their thinking and level of enthusiasm. They work through the transition from student to professional and by the time they are seniors, they are really ready to go. They are well prepared, competent and confident. We know from our alumni and principal surveys that our curriculum is strong and our students are highly regarded by their principals," she added.

Seniors who go to job fairs and consortiums in the spring develop a portfolio for prospective employers to review. The portfolio contains a statement of philosophy, photos of projects, and classroom activities, sample units and lesson plans. Dr. Glosenger feels that this gives them an edge over other teacher candidates.

With more than 1100 alumni currently involved in education, Juniata is touching the lives of thousands of students. It is perhaps comforting to know that these teachers have been educated so well. In fact, for more than 110 years, Juniata College has been preparing teachers to ignite a hunger for knowledge in others.

Why I Want to Teach

by Mary Fortson '90

Today we find ourselves living in a highly advanced technological society wherein the uninformed can barely survive and definitely can't succeed. This is a pluralistic, everchanging society in which we are called upon regularly to make decisions that not only affect our futures but that of others. To be able to make these decisions requires a people who are aware of and sensitive to the human condition and its potential; in other words, the educated.

I believe the most important qualities of an educated person are the development of critical thinking skills and sound communication (speech and written) skills. With this in mind, I decided to be an English teacher because it is in this domain through literature study and rhetorical instruction that such areas are studied.

For me, being an English teacher isn't enough. I have to be an effective teacher, one who can make a difference in the thinking and lives of her students. To do so requires more than a solid educational background, even though this is necessary. An effective teacher must be someone who knows her subject, believes in its importance and cares enough about her students to impart this knowledge to them. This requires more than mere transmission of ideas, but a conviction in your ideas and your ability to transmit them.

Being a teacher is more than a professional career choice. It is a way of life. You are called upon not only to lecture your beliefs, but you must demonstrate them in how you live your life. It means that you not only believe in your subject but in the potential growth of your students and society through an exchange of information. Our continued existence and development depends on this.

I believe I possess the inherent qualities to be an effective teacher and am currently studying to develop and define the academic qualities to become an effective teacher. In this way I can "touch the future" by teaching the present.

Editor's Note: Mary Fortson is a returning adult education student. All prospective teachers are required to submit an essay entitled "Why I Want to Teach" to the Education Department at Juniata.

Senior Julia Thaler was confident and prepared to take over the classroom as a student teacher this fall, as a result of her practical experiences during her first three years at Juniata.

EDUCATION DEPARTMENT FACULTY

HOWARD H. CROUCH, Martin G. Brumbaugh Professor of Education Emeritus, B.S., Ohio State University; Ed.M. Westminster College; Ph.D., Ohio State University; Post-doctorate, University of Florida; Ohio Public Schools, research, Pennsylvania public schools. Dr. Crouch teaches foundation courses for elementary and secondary certification candidates, coordinates and supervises field practicums (other than student teaching) for professional courses, and acts as department representative to local, intermediate unit, and state committees.

HARRIET E. DARLING, Associate Professor of Education, B.S., M.S., South Dakota State University; Ph.D. University of Maryland; further study at Johns Hopkins Hospital Child Life Program. Dr. Darling is Director/Master Teacher of Juniata's Early Childhood Education Center and teaches issues courses related to the hospitalized child, pro-social development in children, and infant development. Dr. Darling speaks regularly at state conferences for child care agencies and family day care providers, and presents annual seminars for local Head Start programs.

FAY I. GLOSENGER, Associate Professor of Education, B.S., M.Ed., Ph.D., The Pennsylvania State University; additional study in British Infant Schools, Lincoln, England; Department Chairperson. Dr. Glosenger supervises early childhood and elementary student teachers and teaches courses in early childhood methods, curriculum and developmental counseling and parenting, elementary social studies, and senior value studies. Dr. Glosenger is active at the state and local level in child advocacy efforts and conference presentation.

CONNIE MACLAY, Assistant Professor of Education, B.S., Elizabethtown College; M.Ed., Ph.D., The Pennsylvania State University. Dr. Maclay teaches courses in educational psychology, adolescent development, secondary methods and communications. She is involved with adult basic education and literacy programs.

KIM M. RICHARDSON, Associate Professor of Education, B.A., Duke University; M.S., Old Dominion University; Ph.D., Temple University. Dr. Richardson supervises elementary student teachers and teaches courses in children's literature, language arts, the teaching of reading and correcting reading difficulties. Dr. Richardson is currently involved in investigating the use of poetry to teach reading to disabled readers and is a regular presenter at conferences on the teaching of reading.

THOMAS W. WOODROW, Professor of Education. B.S., Juniata College; M.Ed., Indiana University of Pennsylvania; D.Ed., Pennsylvania State University. Dr. Woodrow supervises secondary student teaching and works with foundation units and studies in elementary school mathematics and science.

MARGARET L. YAWKEY, Assistant Professor of Education. B.S., Ed., Maryville College; M.Ed., University of Illinois-Urbana; Ed.D., The American University. Dr. Yawkey teaches courses in child development, special education and issues in early childhood education. Her related professional interests include cognitive and language development, the role of play in development, learning disabilities and international studies.

JUNIATA TO HOST GIFTED 4TH THROUGH 7TH GRADERS IN RESIDENTIAL PROGRAM

Juniata College will, for the second year, play host to over 60 of the areas most gifted and talented fourth, fifth, sixth, and seventh graders in the college's New Visions program to be held Sunday, July 8 through Saturday, July 14.

The 8 to 12-year-old would-be writers, actors, lawyers, and scientists will be given the opportunity to explore topics designed to enrich, expand, and inspire each students' special talents.

The residential program, which for many of the students will be the first extended stay away from their homes, will provide opportunities for interaction with other students with similar interests and abilities.

Each day students will participate in two pre-selected academic experiences, one recreational activity, counselor activities, and a group evening program. Among the academic offerings will be:

These gifted students worked diligently on their projects during the "New Visions" camp last summer at Juniata.

Puppetry — From Clay to Rubber — Students will design and make their own latex puppets, learn how to manipulate them, and perform a puppet show using their creations. (Ms. Doris Goehring, Assistant Professor of Speech and Theatre, Juniata College)

My Place in the Living World — Peace Studies Through Biology — Using laboratory and field studies in biology, students will learn about themselves and their environment and will be encouraged to appreciate and value themselves, others and the rest of life. (Dr. Deb Kirchoff-Glazier, Associate Professor of Biology, Juniata College)

Actor's Workshop — An introduction to the concepts of mind, body, and voice as applied to theatre. The class will perform a scene from a Shakespearean play as a culminating activity. (Mrs. Sharon Clewell-Parker, Teacher of the Gifted, Hollidaysburg Senior High School)

Russian Conversation — Students will learn some basic conversations in Russian and be introduced to the Russian culture. Students will write and perform a short skit as their final project. (Dr. Deborah Roney, Huntingdon, Pa.)

Introduction to Sign Language — Students will learn the basics of signing. They will be introduced to the proper hand and finger expressions. American Sign Language (A. S. L.) will be taught in this useful, yet easily learned course. (Ms. Kristal Pote, Sign Language Specialist, Huntingdon Area School District)

Judge and Jury — Participate in an extended case simulation, examine a typical plaintiff's law suit for damages resulting from a defendant's alleged negligence. As a lawyer, judge, juror or witness, act out the case within the context of applicable legal rules. (Dr. Gary Aichele, Assistant Professor of Political Science, Juniata College)

French — Students will learn the basics of the French language and will be introduced to the French culture. (Ms. Martha Zauzig, Foreign Language Teacher, Huntingdon Area High School)

Bridging the Gap — Building toothpick bridges, student contractors will operate simulated architectural firms. They will create strong economical bridges and account for construction costs. Cooperation and competition are bridged in a stimulating project. (Mr. Richard Parker, Physics Teacher, Hollidaysburg Senior High School)

Chemistry Investigations — An early introduction to chemical principles and lab procedures for the curious, would-be scientist. (Mr. Ed McLaughlin, Chemistry Teacher, Juniata Valley School District)

Law and Literature — Students explore sources of values, the authority upon which law depends and the means by which certain rules of behavior come to be accepted as legitimate, through reading excerpts from great books. They will look at law within the context of larger human experience as they explore the basic tension between what the individuals want and what the law requires. (Dr. Gary Aichele, Assistant Professor of Political Science, Juniata College)

Astronomy — Our Only Universe — What is mankind's place in the Universe? We will search for an answer by discussing space probes, planets, comets, stars, galaxies, black holes, quasars and the Big Bang. When possible, we will view the sky with our eyes and with telescopes and identify some planets, stars, and constellations. (Dr. Norman Siems, Professor of Physics, Juniata College)

One of the most popular courses offered at the New Visions camp was the chemistry class. Students here examine a chemical compound in a test tube.

Whispers, Whines, Barbaric Yawps — Writing Poetry, Writing Ourselves — Students will write poems about what they see and hear, both real and fantastical. Sometimes working together, sometimes alone, students will write every day, learn how to look for a poem, how to help each other look, how to rewrite and how to read poems out loud. (Mr. Marty Lammon, Visiting Instructor in English, Juniata College)

Mock Trials and the Justice System — An introduction to the principles and procedures of the American justice system through simulated trial situations. (Dr. Tom Baldino, Associate Professor of Political Science, Juniata College)

Magic of Music — Explore music-related skills and phenomena not generally examined in traditional music classes through hands-on experience with rhythm, recorded music and composition. (Mr. Paul Kelley, Suzuki Music Teacher, Huntingdon, Pa.)

Ecological Explorations — Explore various habitats through square-yard hikes, seining, transects, and high-low hunts. Students will learn to use keys to identify local trees, wildflowers, insects, and birds. Emphasis will be placed on the interrelationships of organisms in each community. (Mr. James R. Pingry, Science Teacher, The Grier School)

Herpetology — The Study of Reptiles and Amphibians — Students will compare the anatomy, physiology, evolutionary history, life-cycles, habitats and current status of all major groups within the classes Reptilia and Amphibia. Hands-on contact with a number of local species will be part of the course. (Ms. Pamela Kavanaugh, Science Teacher, The Grier School)

Bits, Bytes, and Basic Programming — Students enrolled in this class will receive an introduction to BASIC programming. Programmers will learn statement numbers, variables. PRINT statements, FOR/NEXT loops and low resolution graphics. Upon completion of this course, students will be able to write programs and explore countless possibilities with any P.C., at home or at school. (Ms. Debbie Kerr, Math Computer Science Teacher, State College Area School District)

Photography — Students will have the opportunity to explore this art form from the most simple pin hole cameras to the more advanced 35mm models. Participants will not only learn photography techniques, but they will also use the

EDUCATION DEGREE CAN OPEN MANY DOORS

by Michele Johnson '90

Students studying education at Juniata had the opportunity to work with the gifted students at the New Visions camp. Sophomore Shari Thomas is seen here giving assistance to a camper. This is one of the many ways that Juniata students get practical experience with children.

darkroom to develop their own creations. (Mr. Sandy McBride, Professor of Art, Juniata College)

Recreational activities for this year's New Visions program will include:

Karate — Learn the basic punches and kicks of the martial arts. An emphasis will be placed on the common sense use of these skill in self-defense.

Fencing — Become an aristocrat by learning the art of fencing. The study will develop the skills of grace, form, balance and footwork that are needed for this age-old sport.

Aquatics — Come swim in the college's olympic size pool. Opportunities for water games, informational instruction, diving or just "treading around" with your new friends are available.

Tennis — Participate in small group instruction. Instruction is available at all levels — beginner through advanced.

Volleyball — Learn the basics of volleyball and the value of teamwork.

The New Visions program is being coordinated by Dr. Fay I. Glosenger, associate professor of education at Juniata, and Jeff Coppes, an instructor in the gifted program in the Huntingdon Area School District.

With an education degree, it is automatically assumed that a student will graduate and become a teacher in a classroom, teaching either elementary or secondary education. As is evident from several Juniata College education alumni, teaching is just one of many careers a student with a POE in education can pursue. For these alumni, Juniata was the catalyst for their growth and success in the field of education.

Mariella Gacka, a 1987 Juniata graduate, is a second grade teacher to 29 students in Hoheischweiler, Germany with the Department of Defense Dependent Schools (DODDS). Her responsibilities are more than that of a regular teacher because of the special situation of being overseas. "I believe I give some stability to the students because, at times, their parents are away for weeks at a time with military duties," says Ms. Gacka. She felt the teaching consortiums at Juniata, which allowed her to get experience in interviewing, prepared her for the challenges which she has faced.

"I've been amazed at how well-prepared I was upon leaving Juniata," Ms. Gacka says. "The professors at Juniata gave us such a strong foundation in theory and the application of that theory. Also, the professors instilled in us a desire to continue our learning."

Donna Lawler, a 1989 Juniata graduate also felt well prepared for the challenge of teaching after graduation. "Juniata College has a reputation for producing quality teachers, an interactive climate between student and professor," Ms. Lawler says. She received her bachelor of science degree in elementary education on the half-tuition program, created for people who have been out of high school for more than five years and who return to begin or complete their college education. According to Ms. Lawler, a first grade elementary teacher at Alfarata Elementary School in Huntingdon, the education department is "strong and progressive, keeping up to date with all aspects of education."

For another education alumna, teaching in a classroom was not her style, but she loved children. Laura Keat Grindrod, a 1985 Juniata graduate, is a Child Life Specialist at Johns Hopkins Hospital in Baltimore, Maryland. The choice of Juniata was easy for her because of the flexibility of the program of emphasis, the practicums done before student teaching, and the lab school on campus.

"Child life encourages me to deal with the emotional effects of hospitalized children," Ms. Grindrod says. "It allows me flexibility to work with groups of children as well as individually." As a child life specialist, she prepares medical procedures, provides emotional support during procedures, and creates therapeutic activities for hospitalized children. She also supports the family and establishes long term relationships with chronic and terminal patients.

Ms. Grindrod's education background proved a valuable asset for her. "There are so many things you can do with an education degree from Juniata," Ms. Grindrod says. "You need to have a clear understanding of the development of a healthy child before you work with sick children."

One of the most important aspects of choosing Juniata for a

Joe DeBlase, a 1989 graduate of Juniata, teaches eighth and ninth grade students at Somerset Junior High School. Here he tutors a student in mathematics. DeBlase is responsible for supervising the TELLS program and working with students who have difficulty in math. He tries to be a motivator and role model.

degree in education is the ability to receive an education with a strong grounding in the liberal arts. According to George Dempsie, a 1983 graduate, his liberal arts education has given him a definite edge over others in his field. "Because of my liberal arts education, I feel I am having a rather creative influence on the education of the children I teach. Creative thinking is an important skill, as is imagination. I do a lot with puppets in my classroom to foster this creativity."

An added dimension to a Juniata liberal arts education which has proven valuable is the opportunity to study abroad in a student's junior year. Mr. Dempsie spent his junior year in Cheltenham, England and is still reaping benefits from his experience.

"I am convinced that my participation in the Brethren Colleges Abroad program in Cheltenham, England gave me an edge over others in my field," he says. "Having some experience in international education helped me land my first job as a kindergarten teacher in Ridgewood, New Jersey — one of the nation's top ten school districts. I got the job over several hundred applicants." Mr. Dempsie also feels that this had some influence on his obtaining his third and current position as a first grade teacher in State College's Easterly Parkway Elementary School, which has a large foreign student population.

Regardless of the occupation, All Juniata education alumni interviewed feel as though their occupation has made a difference in the lives of their students, colleagues, and their families.

"I'd like to think that I make a difference in the lives of students, mostly because I am providing a warm, caring role-model for young children — many of whom don't have fathers at home," Mr. Dempsie says. "I hope that I make a difference with my colleagues in that I might break a stereotype for some of them that only women can relate well to young children, or that early childhood education is a female field."

Ms. Gacka thinks that both she and her colleagues can make a difference together. "I've been able to share some of my ideas with colleagues and they've shared with me. Together we make a positive difference. If teachers are able to stay 'excited' about what they're doing and continually seek new and fresh ideas for teaching a concept, then the students will also benefit."

The situation Joseph DeBlase, an eighth and ninth grade mathematics teacher in Somerset, deals with is much different. Not only is the 1989 graduate teaching older students, but he teaches the lower sections which brings to the classroom a whole different set of problems. "I try to be a good role model above all else," emphasizes Mr. DeBlase. "The kids like the image of being in the lower section — that way nothing is really expected of them but I try to push them and let them know that they aren't 'dumb', that they do have ability."

Although Ms. Lawler is instructing first graders, she does not feel it is ever too early to teach children how to learn. "I hope the children I teach will learn to always 'think' and never be afraid to question. Overall I hope the children feel stimulated and challenged," Ms. Lawler says.

For each of these alumni, their preparation at Juniata has enabled them to continue to speak highly for the program.

"Go for it. It (teaching) can be very rewarding," Mr. DeBlase says. "And there's no better place to start than at Juniata because when you're competing for a job with other teachers, Juniata is a name that you'll want in your corner. Adjusting to first year teaching was easier for me because I was educated for what was to come, but I see other young teachers struggling and I hear horror stories from older teachers that let me know that being from Juniata, I had an advantage that other teachers did not."

Ms. Lawler was in a different position as a non-traditional student. "As an older student, I couldn't have felt more comfortable anywhere else. The supportive environment Juniata provided was essential to my earning a degree in education."

Books

EDUCATION DEPARTMENT MAY BE HELPFUL TO ALL STUDENTS

The flexibility of Juniata's Program of Emphasis allows students to incorporate a wide variety of courses into their areas of study. Students interested in majoring in education have always found Juniata's state certified education program to be one of the most comprehensive in the state. Many, non-education majors have also been taking classes in the education program to develop a better understanding of children to use in other areas of study.

Non-education students have taken education classes to assist them in a variety of careers which include educational communications, continuing education, medicine, allied health, college admissions counseling, educational consulting, adult education, day care operations, educational agency service, law enforcement, research, sales, public relations, industrial education, outdoor education and work with community service agencies, group care homes and institutional care settings. Some students take an education class or two just to prepare them to be better parents in the future.

According to Dr. Margaret Yawkey, assistant professor of education, most of the students that use education classes to supplement their majors are studying pre-medicine, pre-health, pre-nursing, physical therapy, child psychology, or sociology. Dr. Yawkey said that the students take classes that have a human development perspective. "Most of the students take either Child Development or Introduction to the Exceptional Child. Both classes view the child as a whole individual and view the development of the child in a physical, cognitive, and psycho-social sense," she said.

According to Dr. Yawkey, students can gain a perspective on child growth and development in differing environments — home, school and peer relationships. "They get a feel for children's reactions and needs in crisis situations like illness, divorce and death," she said.

Non-education majors get the same practical experience that the education majors get working with the developmentally disabled, physically handicapped, sensory impaired, and those students with learning disabilities. According to Dr. Yawkey, students work with a variety of agencies. "We have students working with Horsepower and Headstart to cite two examples. Horsepower is an outdoor education experience for exceptional children where children can learn to work in and out of school. Headstart gives our students the chance to help children develop socialization skills, cognitive and language skills, and it teaches kids the roles and viewpoints of other children," she said.

"Our non-ed majors also do practicums at J.C. Blair Memorial Hospital to get experience as child life specialists. They deal with terminally ill children and with their parents as well. These students work with both the parents and the children to help them cope," said Dr. Yawkey. According to Dr. Yawkey, these types of experiences help future pediatricians, future social workers, and future child

Education students at Juniata take advantage of co-curricular activities to enhance their educational experience. Many get involved with Special Olympics, others become Big Brothers or Big Sisters, and some are involved in leadership roles in scouting groups. Junior Maureen Gillon finds working with "Special Friends" a very rewarding experience. Here she takes time out from her busy schedule to spend time with a friend.

psychologists and many others.

According to Dr. Yawkey, all of the students in the Child Development class work in the Early Childhood Development Center, located on the campus. "All of the programs give education majors and non-ed majors, the chance to interact and work with children from the infant stage to the pre-adolescent stage," said Dr. Yawkey.

Juniata students are also given the opportunity to work in co-curricular activities. These programs include Big Brothers/Big Sisters, Special Olympics, Special Friends, and the summer program New Visions. These volunteer programs give students the opportunity to put their classroom training and practical experience to use.

Dr. Yawkey said that the wide variety of experiences, dealing with the handicapped, the mentally retarded, the emotionally disturbed, the learning disabled, and the sensory impaired all give students the theories, practice and experience in dealing with children and the parents. She concluded, "It can be helpful for anyone. Some students take these classes as a personal growth elective, just to learn some of what to expect when they become parents."

Early Childhood Education

LEARNING AND TEACHING CROSSES GENERATIONS OF JUNIATIANS

"Yesterday, a child came out to wonder,
caught a dragonfly inside a jar,
fearful when the sky was full of thunder,
and tearful at the falling of a star."

Joni Mitchell
"Circle Game"

In what has surely become one of the many classic songs written by Joni Mitchell, the artist conjures up thoughts of a child's wonder in life, and all of the beauty, magic, and sometimes fear, within it. The listener is inevitably taken back to frozen moments in time from their own childhood, and realizes that as children they saw things with a pristine innocence and amazement that only a child can feel. To many, the loss of that pure vision is often regretted.

The void can be easily filled, however, through interacting with children. Whether as a parent, a teacher, or a volunteer, witnessing the wide-eyed wonder of childhood can be fulfilling and invigorating. A child's thirst for knowledge is unquenchable. The return on attention given or kindness shown a child is unconditional.

For 28 hours each week of the semester, 65 children ranging in age from 16 months to six years interact with, learn from, and sometimes teach, Juniata College students and faculty in the college's Early Childhood Education Center.

The Center, directed by Harriet Darling, associate professor of education, with the assistance of co-teacher Chris Breene, instructional assistant, is operated in Leshner Hall as a vital extension of the Education Department. Over 50 students participate in Center activities each semester.

"Students are involved in the Center in a variety of ways," according to Ms. Darling. "Students who work with us in the Center are from classes in Child Development, Curriculum N-3, Developmental Counseling and Parenting, and the Practicum in Early Childhood Education. Occasionally," she added, "a student will work in the center to satisfy the early childhood student teaching requirement, and students in the Developmental Reading Course may spend several weeks in the Center."

"Many students in disciplines other than Education also study at the Center," she said. "The Child Development course in particular is taken by all kinds of people. Business majors take it, and pre-med students take it, for example."

"For the pre-med students, the course fulfills the developmental psych requirement and usually the students who choose to fulfill the requirement in this way do it because they like coming in and working with the kids. Some business majors have chosen it because they think they might like to work with child care products, or in the children's clothing industry, or perhaps in toy manufacturing. Others take it simply because they think it's a good idea to have some experience with children."

The majority of Juniata students working at the Center, however, are students planning to become educators. "First,"

These four future Juniatiens, enjoy the sand box in the Early Childhood Center at Juniata.

according to Ms. Darling, "students observe the children they are going to teach to see what they already know about a particular topic, and then plan activities to further that knowledge. After planning activities in the curriculum areas of language and communication, mathematics and logical reasoning, social studies, creative arts, social development and responsibility, and science, the students have learned a great deal about how to teach young children."

"The students have also learned some things about themselves," she added. "They may have discovered that there are some readjustments necessary; perhaps a change in ideas of what young children can do is required, so that the planned activities appeal to and are useful to the children. The students may have discovered that too low an expectation of a child's interest and ability can cause a young child to 'turn off' as easily as too high an expectation. The students may also have come to realize that they find some

children easier and more pleasurable to work with than others. In such an instance, the students search for the reasons behind the feelings, and then determine how these feelings will affect professional development as educators of young children."

The role Ms. Darling and Ms. Breene fill at the Center is that of teacher. "Our primary obligation is to the children. By doing a good job with the children we are fulfilling our major role to the students, which is to provide a model of someone who works with children in appropriate ways. Along with that goes planning activities that are appropriate, and planning a mix of activities so that we do not over emphasize one area at the expense of another.

"In addition to the planning, which is something that I think students are unaware of because it goes on after they are gone, is the interaction with the children. We have to make sure that no matter how we feel that day, our interaction is as appropriate as it possibly can be for the situation. If, for example, we are talking to students about phrasing their instructions to children simply and positively, then we must be sure to use positive statements. That is our strongest role, as a model for our students."

The Early Childhood Education Center has an added benefit to the entire college community in that it brings an additional component to the diversification of Juniata's campus. "The more diverse your campus population is," Ms. Darling said, "whether you're considering ages, sexes, or races, the more beneficial it is to everyone." The Early Childhood Education Center provides that and so much more in making life on the Juniata College campus more fulfilling and rewarding.

The center is not exclusively utilized by education students. Students in other disciplines also gain valuable experience from working with the children.

Senior Tonya McClucas works on an art project with two students in the center.

AROUND AND BEYOND CAMPUS

The college community celebrated the installation of Dr. Karen Wiley Sandler, vice president and dean of academic affairs, this fall.

INSTALLATION OF ACADEMIC DEAN HELD AT JUNIATA

Dr. Karen Wiley Sandler, vice president and academic dean at Juniata College, was formally accepted by the college community at an installation ceremony on Saturday, October 14 in Oller Auditorium. The installation was held in conjunction with Education Week activities at the college.

Presiding at the ceremony, which was attended by faculty members, dignitaries, guest speakers, and college administrators in full academic attire, was Charles C. Ellis, a member of the class of 1940 and chairman of the Juniata College Board of Trustees.

As part of the ceremony, greetings were brought from senior class representative Tamara Takarchek, a biology major from Turtle Creek, Pa.; Larry Barker, chairman of the Juniata College Parents' Council; and, representing the faculty, was Dr. Norman E. Siems, professor of physics.

The installation address was presented by Maya Lin, designer of the Washington, D.C. Vietnam Veterans Memorial and the Elizabeth Evans Baker Peace Chapel at Juniata (see related story). Ms. Lin was on hand for the dedication of the chapel immediately following the installation ceremony.

Dr. Sandler is the former associate provost at Gettysburg College. She

began her tenure at Juniata with a diverse background in academic affairs, student services, and teaching. Dr. Sandler received her bachelor of arts degree in French in 1964 from The Principia College, followed by completion of her masters degree in French at The Pennsylvania State University. Dr. Sandler completed requirements for her Ph.D. in romance languages in 1972 at The University of Pennsylvania.

Dr. Sandler held faculty appointments at The University of Vermont from 1969 through 1985. She held a non-tenured appointment in the French department at Gettysburg College, teaching Freshman Colloquy in Liberal Learning and serving as a freshmen advisor.

Dr. Sandler's first involvement in college administrative work came in 1982 when she served as coordinator of workshops on academic advising and coordinator of the instructional incentive grants program of the College of Arts and Sciences and the Instructional Development Center at The University of Vermont.

In 1983, Dr. Sandler assumed the position special assistant to the dean of the College of Arts and Sciences at the university. As the special assistant she advised students having academic difficulty, conducted academic advising workshops and monitored study abroad and honors programs.

From 1984 to 1985 Dr. Sandler served the university as acting assistant dean

and director of student affairs for the College of Arts and Sciences. As such, she planned and carried out programs for parents and students, advised department chairs on scheduling and curricular issues, advised the curriculum committee on enrollment patterns, and planned the college's commencement program.

Dr. Sandler began her tenure at Gettysburg in 1985 as the assistant provost. Among her many duties and responsibilities she chaired the Academic Standards Committee, initiated a retention study and implemented the recommendations resulting from the study, advised the provost on major restructuring of academic advising and support services, and chaired the Orientation Task Force which was charged with revamping the freshman year experience.

In 1988 Dr. Sandler assumed the responsibilities of associate provost with particular emphasis on curricular innovation including writing across the curriculum, core or related course design, critical thinking, and women's studies programs. Among Dr. Sandler's other responsibilities she prepared the academic support budget for all departments, worked with faculty on the development of grant proposals, and worked closely with all academic committees on advising and enrollment development.

EMERITI ASSOCIATION FORMED

Before a joint session of Congress on the occasion of his retirement from the armed services, Douglas MacArthur pointed out that old soldiers never die, they just fade away. Fading away is the last thing on the minds of a group of retired Juniata administrators and faculty members who recently organized the Juniata College Emeriti Association.

The group, brought together by Howard Crouch, professor of education emeritus, and George Dolnikowski, professor of Russian and German emeritus, is in the process of fleshing out its role and purpose.

According to Dr. Crouch the group is, in fact, made up of two groups of emeriti. "The first group is made up of members who have held emeriti status for some time, Harold Brumbaugh, Esther Doyle, Eva Hartzler, Ken Crosby, and Harry Klug. Most of our older emeriti members see the group as an opportunity to get together and keep in touch with each other and with the College," he said. "Certainly, this is an important purpose of the group."

"The group of more recent retirees — George, myself, Ernie Post, Paul Heberling, Pete Trexler, Mary Ruth Linton, and Fred Binder — has added to this. We welcome the social benefits

of the group, but we are looking at ways we can continue professionally and how the group can be the base for our ongoing professional activity. The difference," he said, "is that now it is at our pace and under our control."

"For instance," he went on to say, "one of the most difficult things that a current faculty member faces is leaving their class to go to a conference. It is conceivable that as this group grows, and it will grow, people within this retired group could be available to step in for a period or two. We could also be available as guest lecturers."

Another possibility being considered by the group is the teaching of short term courses in continuing education or assisting current faculty in the teaching of certain courses in which the retired faculty member has special expertise, for example. "Someone who had a specialty in their field — someone in education, biology, or English — who has had a specialized area of interest might serve as a guest lecturer for a period of two or three weeks," Dr. Crouch suggested, "presenting a certain aspect of their strength. I could see that happening, certainly with a lot of the people coming out now."

As Juniata changes as an institution the Emeriti Association members would

hope to be involved in deciding the direction the College ultimately takes. "I would hope that the emeriti would have a means of input into the curriculum," he said, "perhaps through some of the standing committees, or perhaps, more appropriately, through a committee of our own where specific problems could be passed before us and where we could serve in more of an advisory capacity than anything."

As the Emeriti Association grows and broadens its base, Dr. Crouch sees the group getting involved in the recruiting of students through the admissions office. He would also like for members to be invited to attend alumni gatherings to assist in keeping graduates in touch with the institution.

"There are a lot of us who are not retiring from the profession. We are only retiring from the job," Dr. Crouch noted. "What we are doing is preparing the groundwork for people to have more than the word emeriti after their name."

The Association meets on a monthly basis. Anyone wishing to have more information on the Association should contact George Dolnikowski, Juniata College Emeriti Association, Juniata College, Huntingdon, PA 16652.

Juniata College students donated more than 500 canned goods to the Huntingdon Food Bank in December. Students attending the festive Madrigal Dinner were asked to provide a canned good for the less fortunate of Huntingdon County.

Vietnam Memorial Architect Presents Keynote Address

To appreciate the art and architecture of Maya Lin, designer of the Vietnam Veterans Memorial in Washington, D.C. and Juniata's Elizabeth Evans Baker Peace Chapel, is to appreciate the artist. Ms. Lin's designs are remarkable in their simplicity, yet, once carried out, are powerful and deeply moving. Her art does not intrude upon the surrounding environment, it becomes an integral part of it as evident in the Vietnam Veterans Memorial.

Ms. Lin served as the keynote speaker at convocation ceremonies marking the installation of Dr. Karen Wiley Sandler as the college's academic dean on Saturday, October 14.

Immediately following the ceremony, Ms. Lin participated in the dedication of the Elizabeth Evans Baker Peace Chapel, located in a college owned nature preserve adjacent to the campus. The chapel, like so many of Ms. Lin's designs, does not interfere with the existing character of nature, it has been carefully thought through to become a part of the nature preserve in which it exists.

Ms. Lin's rise to prominence began during her undergraduate work at Yale University. As a 21-year-old architecture student, Ms. Lin participated in a course in funerary architecture which had as one of its assignments the

Maya Lin, designer of the Elizabeth Evans Baker Peace Chapel, explains her work during a dedication service this fall at the Baker Henry Nature Preserve.

Vietnam competition. The students visited the site in Washington. Ms. Lin's impression was one of living people enjoying a sunny, open park that should not be taken from them nor trivialized into a setting for a monument.

In an interview in AIA Journal (May, 1983), Ms. Lin recalled, "I thought about what death is, what a loss is — a sharp pain that lessens with time, but can never quite heal over. A scar. The idea occurred to me there on the site," she said. "Take a knife and cut open the earth, and with time the grass would heal it. As if you cut open the rock and polished it."

Of the over 1,400 entries, Maya's was unanimously selected.

Engraved with the names of over 58,000 Americans killed or missing in Vietnam, the two simple black-granite walls rising out from the ground to form a V at the western end of Constitution Gardens have become one of the nation's most respected works of public art.

In discussing Maya's entry, Grady Clay, who chaired the selection committee, said "It reflected the *genius loci*, the spirit of the place, and went beyond it to echo the national trauma arising from the Vietnam war and its aftermath. It thus became a memorable work of art in itself. And that," he said, "seems to be essential in all great works of landscape architecture."

The Peace Chapel at Juniata is no less intriguing. A series of salt and pepper granite stones rise from the earth on a grassy knoll to form a circle for group meditation. Within the stones, each extending several feet above ground level, is a concave impression in the earth.

A second site, several hundred yards from the first, is located in a small grove of trees on a knoll higher in elevation than the circle of stones. It is here that individual meditation may occur.

The circle of stones, designed for group experiences, is visible from the individual site. The individual site, however, can not be seen from the circle of stones.

Maya Lin

Ms. Lin, whose parents fled China in 1948, comes from an artistically talented family. Her father, Henry Lin, was dean of the School of Fine Arts at Ohio University (Athens). Her mother is a poet and professor of Oriental and English literature at the university. It was at Ohio University that Professor Lin established a close friendship with John Baker, president of the University from 1945 to 1961. Mr. Baker, a 1917 graduate of Juniata College, has served on the Juniata College Board of Trustees since 1936.

Ms. Lin's involvement in the design of the Elizabeth Evans Baker Peace Chapel, and her association with Juniata, represents an extension of the relationship between the Baker and Lin families.

(Right) Anne Baker delivers a message on behalf of her mother, Elizabeth, for whom the Peace Chapel is named. (Below) Thousands of people have visited the Vietnam Memorial in Washington, D.C., designed by Maya Lin. This Vietnam veteran, with his son, identifies the name of a friend lost in the conflict.

Juniata College Hosts International Symposium

The Third Annual Conference of the Central Pennsylvania Collaborative for International Education was held at Juniata College in October. The conference took place in conjunction with Juniata's celebration of International Week.

The conference, entitled "Opening Our Windows On Latin America" was attended by elementary teachers, secondary teachers, administrators, college/university faculty and high school students covering 11 counties in Central Pennsylvania.

The purpose of the conference was to help teachers and high schools prepare for the international challenge of the next decade. According to Dr. William C. Vocke, director of international programs at Juniata College, "This particular conference was intended to strengthen international studies in school districts, foster student commitment to improve international understanding, and to explore current social, political, ecological, and cultural issues in Latin America."

More than 120 people participated in the conference that addressed diverse views of Latin American resource issues, economic issues, political issues, cultural issues and communication issues.

Among the speakers for the two day conference were Helen Wise, secretary to Pennsylvania Governor Robert Casey's cabinet and Bob Edgar, director for the Committee for National Security.

The collaborative was formed to encourage the development of an international dimension among students, teachers and community leaders of central Pennsylvania. It has been seeking ways to form a network of teachers interested in international studies. "Recognizing the increasing pressures placed on schools, businesses and communities by the world beyond the Commonwealth, the Central Pennsylvania Collaborative for International Education wants to be ready to meet the challenges and opportunities that will come with the 21st century. An understanding of other people, languages, cultures and systems will be crucial for America's prosperity," Dr. Vocke said.

SPECIAL OLYMPICS ARE SUCCESSFUL AT JUNIATA

More than 70 Special Olympic athletes from Central Pennsylvania participated in the Regional Special Olympics Volleyball Tournament at Juniata College this fall.

This event was the third annual event in which Juniata and the Pennsylvania Association of Special Olympics have been partners. The games management team was comprised entirely of Juniata College students who facilitated the competition, supervised opening and closing ceremonies, raised funds, and planned special events for the athletes.

Opening ceremonies began with the passing of the torch and a parade of athletes. Juniata College President Robert W. Neff, welcomed the athletes and coaches to the campus, followed by greetings from Huntingdon Mayor Mike Scialabba. Juniata was recognized for hosting this most meaningful event by Nora Dickey, central competition and training coordinator for Special Olympics. Members of the Juniata College Choir sang the National Anthem, and Scott Steele, a freshman at Juniata, read the Special Olympics Oath. William Huston, director of programming and conferences at Juniata, declared the games officially opened, which brought cheers and applause to all who looked on.

More than 100 students from Juniata volunteered for this event. "For the third consecutive year Juniata students demonstrated their emphasis on caring for the growth and development of others. The games' management team, led by Beth Angerole and Bonnie Fogel, sacrificed their social and study time to ensure that the Special Olympic athletes were engaged in a high quality program," said William Huston.

Athletes embraced the Juniata students in appreciation for their care and devotion to the program. Others asked for photographs, addresses and autographs.

"I thought the event went really well. It was really enjoyable and a very meaningful experience for us. It was terrific to see the athletes smile and enjoy themselves so much," said JC

student Beth Angerole, games director.

"Special Olympics is an international program of sports training and athletic competition for children and adults with mental retardation. It provides competition at all levels of ability, with the purpose being to help the mentally retarded to become healthier in body and spirit," Huston added.

Juniata College Trustee Appointed to Presidential Advisory Committee

President Bush has appointed Girl Scout National Executive Director and Juniata College trustee Frances Hesselbein to serve on the President's Advisory Committee on the Points of Light Initiative Foundation. As described by the White House, the foundation will identify, enlarge and replicate existing community service initiatives that are successful, as well as discover and encourage new leaders. The Advisory Committee is charged with reporting to the President on the legal structure of the foundation and the legislation needed to establish it.

Mrs. Hesselbein is the only representative of the human service sector and the only woman to serve on the committee, which will be chaired by Thomas H. Kean, former governor of New Jersey and president designate of Drew University. Other members are Edward H. Brennan, chairman and chief executive officer of Sears, Roebuck and Co.; Norman A. Brown, president of the W.K. Kellogg Foundation; and Vernon Jordan, attorney and former president of the National Urban League.

"Organizing volunteers for community service is a great American tradition," Mrs. Hesselbein said. "That tradition will be immeasurably strengthened by President Bush's establishment of a Points of Light Initiative Foundation to work with and through existing organizations. I believe my appointment to the President's Advisory Committee recognizes the 'points of light' that are already being kindled by millions of American volunteers in thousands of voluntary organizations. I am honored to represent those millions."

Juniata College President Robert W. Neff; Tom Spicher, van driver and associate project director; Dr. Donald Mitchell, professor of chemistry and project director; John Irvin, JC alumnus and executive director of domestic and clinical research at Merck, Sharp & Dohme; and the Honorable Samuel Hayes, district representative to the Pennsylvania House take time to examine the Chemistry Van equipment following a press luncheon on College Hill.

JUNIATA COLLEGE RECEIVES NATIONAL AWARD FOR SCIENCE IMPROVEMENT PROJECT

Juniata College was recently selected among ten private liberal arts colleges and universities in the nation to receive a Merck Innovation Award in Undergraduate Science Education. The college was recognized for the Central Pennsylvania Chemistry Teachers' Science Education Improvement Project.

The award, which consists of a lucite sculpture and a \$15,000 discretionary grant, was offered by The Merck Company Foundation of Rahway, New Jersey. Merck is a research-intensive pharmaceutical company that discovers, develops, produces, and markets human and animal health products and specialty chemicals.

Through the project Juniata has literally taken to the road with its efforts to provide support for the instructional needs of area high school chemistry teachers. Through the college's chemistry department, Juniata offers teachers professional in-service to update their knowledge of chemistry and use of technology and instrumentation in chemical experimentation.

In addition, a "Science Van" equipped by Juniata and administered full-time by a certified chemistry teacher

serves the teachers' equipment needs by delivering modern instrumentation directly to the classrooms of the 22 schools served by the project.

The program is the result of a partnership formed in 1985 between the college's chemistry department and an association of area chemistry teachers, to improve the pre-college preparation of students and increase the number of undergraduates who go on to choose science majors and careers.

Giving high school teachers in rural districts access to the theories and technology of contemporary chemistry is at the core of the program. The program is designed to assist instructors in working around such constraints as outdated laboratories, unrealistically low budgets for chemicals, the need to make several different laboratory preparations daily, and having little or no contact with the broader science community.

Throughout the school year, teachers from 22 participating high schools may call for Juniata's Science Van to supplement their work with students in the classroom. The van's services are administered by a certified science

teacher who schedules visits and equipment loans and can provide teachers with assistance both in set-up and classroom instruction.

The program has spawned several outgrowths fueled by the interests and energies of its participants. Summer and sabbatical-year research opportunities at the college are available for members of the chemistry teachers association. During the school year, Juniata holds workshops on topics of concern to the teachers, such as problem solving techniques in science education. The college also sponsors a regional science fair for the students of teachers who have participated in the institutes.

The Merck Innovation Awards Program in Undergraduate Science Education was developed with the assistance of the Consortium for the Advancement of Higher Education (CAPHE). The awards recognize institutions that have addressed issues in science education in creative, effective, and exemplary ways. According to CAPHE representatives, these are distinctive approaches that demonstrate fresh thinking and imaginative use of resources.

JUNIATA COLLEGE ANNOUNCES HALF- TUITION PROGRAM

Juniata College has announced the expansion of a program which allows qualified Huntingdon County residents who have been out of high school five years or more to attend classes at the college at half the regular tuition rate.

The program has been expanded to include those residents in Bedford, Blair, Centre, Franklin, Fulton, Juniata, and Mifflin Counties.

According to Juniata president Robert W. Neff the college owes a great deal to the people of Central Pennsylvania who have helped to make the college one of the best small liberal arts colleges in the Northeast.

"Throughout the long history of Juniata College," he said, "the residents of Huntingdon County and those counties contiguous to it have made significant contributions to the college. The Half-Tuition Program was established and has been expanded to provide new educational opportunities for non-traditional students in those regions that have supported the college so faithfully in the past.

"We feel there is a tremendous amount of untapped potential in the people of Central Pennsylvania," Dr. Neff continued, "which, given the opportunity, could be developed to the point where these talented individuals could make even greater contributions to the development of our region."

The program is designed for commuting students interested in full-time or part-time study. They may be working toward a degree or they may wish to simply take courses to brush up on or enhance skills. Program participants may enroll in any regularly offered course at the college.

For one area resident who has been in the program since it began in Huntingdon County in 1987, the experience has changed his life. "Education is great," said Jeff Mills, assistant manager of Bucks Laundry in Huntingdon. "You tend to get into a rut with the day-to-day grind and it's easy to stagnate. What I'm getting at Juniata is overwhelming. It has really been great.

"Making my brain work again has

helped me in so many ways. I'm a better person and a better employee. Having gone through my anthropology class for example, I now look at people I come in contact with through my work and see interesting things in them which I may have never noticed before.

"Through my English II class I learned to accept people for who they are. I remember thinking how odd some of the students were in their dress or in their way of thinking. I've learned to look at differences in people as simply the way they choose to express themselves and that makes me want to know more about them," he said.

For many people, thinking about returning to college appears to be so difficult that they never take the first steps. At 34 going back into the classroom wasn't easy for Jeff either, but he overcame his apprehension.

"Starting back was real scary," he said. "My biggest concern was how I would mix with the 18 to 22 year old students. What I found was that the Juniata students are really easy to get along with and they value my perspective on things. They really believe that I can add to their personal experience. It's a great feeling for me, as well."

According to Charles Kensinger, Juniata's director of admissions, since beginning the program in August of 1989 over 350 inquiries have come in from people interested in enrolling at Juniata.

An added benefit, according to Mr. Kensinger, is a more diverse student body. "Just imagine the advantages to our traditional students of being in a class which may be discussing John Kennedy's years in the White House, for example, and having someone other than the professor who actually lived through those years. Everyone benefits from the involvement of members of our community in the educational process," he said.

In conclusion, Jeff Mills, who graduated from Huntingdon High School in 1973, underscored the advantages of education and the Juniata College Half-Tuition Program. "You can't beat the opportunity," he said.

Dr. Terrell Jones of The Pennsylvania State University presented a workshop on cultural diversity and multi-cultural awareness as part of the Student Services Development Series.

Many Visitors Speak on Campus this Fall

Juniata College presented a variety of student development programs, workshops, lectures, and seminars this fall. The programs were designed to provide the college community with the opportunity to be exposed to many unique and diverse experiences.

The Student Services Development Series featured four programs intended to increase student awareness and to develop better student relations. The series began with the playfair program in August. Playfair, a freshmen orientation program, featured ice breakers and exercises to introduce students to each other. The second program entitled "Metamorphosis" was presented by Joel Gori. It was a "psycho-drama" on gender communication which provided a series of role plays covering topics from sexual communication to acquaintance rape. The program concluded with a question and answer session.

The next program, featured a lecture on drug and alcohol abuse by Mike Green. Green, a recovering alcoholic, presented his experience and knowledge of the dangers of drug and alcohol abuse as part of National Alcohol Awareness Week. His goal was to educate and stress moderation

without moralizing. The final program in the series this semester was a workshop on cultural diversity, presented by Dr. Terrell Jones. His workshop used group exercises, bias tests and discussions to examine cultural awareness levels of Juniata students.

German professor Dr. Wilhelm Willemer and his wife, Annette spoke on international developments in Europe and their effect on the United States after the 1992 opening of the European Common Market. Dr. Henry Bent, professor of science education at the University of Pittsburgh, lectured on science and abstract art.

The first annual Parents Seminar was held as part of Juniata's Parents' weekend '89. Dr. Merrill Lynn lectured on "Air Pollution and the Automobile."

Dr. Lawrence D. Weiler, professor at George Washington University, presented a lecture entitled "Controlling the Arms Race: Where Are We and How Did We Get Here?"

Photojournalist, Catherine Bauknight, showed her dramatic Tiananmen Square photographs in a slide presentation on China.

Acclaimed writers David McKain and Margaret Gibson, presented public readings of their works. Both authors were sponsored by the Juniata English Department.

The Juniata College Student Health Advisory Committee (SHAC) presented the "AIDS educational forum" which was intended to provide students with information on risk reduction and to illustrate the medical, psychological, moral and legal implications of the AIDS virus.

Several residencies, lectures and presentations are also scheduled for the second semester.

Juniata's Murray Elected President of National Peace Studies Association

Dr. Andrew Murray, director of the Baker Peace Institute at Juniata College, has been elected chairman of the executive committee for the national Peace Studies Association (PSA). As chairman, Murray will also serve as president of the association for the next year.

The Peace Studies Association is an organization of college and university academic programs for the study of peace, conflict, justice, and global security. It was formed in December 1987, and is intended to complement the work of existing programs by addressing the needs of those programs as well as those of emerging peace studies programs.

Juniata College, one of 23 schools which helped charter the organization, is among over 80 colleges and universities in the association. The PSA currently houses its executive office at Bethel College in North Newton, Kansas.

Among Dr. Murray's first duties will be long range planning regarding the association's national offices and the hiring of an executive director. Dr. Murray will also preside over the PSA's second annual national convention March 8-10, at the University of Oregon, Eugene.

"One of our goals is to bring all of the many college and university peace studies programs into the organization and make it a channel for communication among programs. The PSA must be the leading advocate for establishing the place peace studies occupies in the academic structures of our nation's institutions of higher education," said Dr. Murray about the PSA's mission.

Dr. Murray has been a key contributor to the PSA in his role as co-chairman of the executive committee's "Emerging Programs and Outreach Committee" over the past year. The committee developed a packet of resources for emerging programs that has been requested by over 80 colleges and universities across the United States.

"We've had inquiries from well-known private universities as well as public universities. The requests represent an exciting cross-section of institutions nationwide with a tremendous potential for growth in peace studies and the PSA as an organization," said Dr. Murray.

Dr. Murray was elected to his new post as chairman of the PSA executive committee at the organization's fall meeting at The American University in Washington, D.C., in November.

Dr. John C. Irvin '68

ALUMNUS SPEAKS AT JUNIATA

Juniata celebrated National Education Week (October 9-October 14) with a flurry of events beginning with a day of activities in celebration of the college's nationally recognized Chemistry in Motion Project.

The project, now in its second year of operation, is designed to link science education at the college level with that of secondary schools throughout Central Pennsylvania.

The highlight of the day was the luncheon presentation of the Merck Innovation Award in Undergraduate Science Education to Juniata for its efforts at improving secondary school science education programs (see related story).

On hand to make the presentation was Dr. John D. Irvin, executive director of clinical research at Merck Sharp & Dohme Research Laboratories in West Point, Pa. The award was sponsored by the Merck Foundation. Dr. Irvin, who received his B.S. degree from Juniata in 1968, graduated from Juniata Valley High School, one of the schools served by the Chemistry In Motion Project.

Dr. Irvin, who in 1975 completed requirements to concurrently receive M.D. and Ph.D. degrees from Hahnemann Medical College and Graduate School, holds adjunct associate research professor status in the Department of Physiology and

(continued on page 20)

(continued from page 19)

Biophysics at Hahnemann University. He is also an adjunct research professor in the Department of Neurosurgery at Jefferson Medical College of Thomas Jefferson University.

Other activities taking place during the day of celebration were a workshop for secondary school chemistry teachers, a leadership conference for school superintendents, principals, and Juniata faculty members and a public lecture held that evening in the Brumbaugh Science Center.

The workshop, designed to offer teachers professional inservice to update their knowledge of chemistry and use of technology and instrumentation in chemical experimentation, is an integral part of the Chemistry in Motion Project. The college's Chemistry Department hosts several workshops throughout the course of the school year.

The leadership conference, entitled "School-College Partnership Needs and Opportunities in Central Pennsylvania," brought representatives of the 22 schools involved in the project together with Juniata faculty and administration members. The purpose of the conference was to discuss additional opportunities for increased collaboration between the college and the region's schools.

Concluding the day's activities was a public lecture on "Science and Abstract Art" presented by Dr. Henry Bent, professor of science education at the University of Pittsburgh. Dr. Bent was on campus to conduct the teacher workshops held through the course of the day.

Janet Kauffman '67

DISTINGUISHED LITERARY ALUMNA ADVOCATES SUPPORT FOR JUNIATA'S BEEGHLY LIBRARY

The next time you visit your local bookstore or library look up the works of Janet Kauffman. Not only will you be entertained by her writings; you will be proud to know this major contemporary American writer is a Juniata graduate.

Kauffman, now a resident of Hudson, Michigan, has become a well known author during the decade of the 80's, and her most recent book of short stories — *Obscene Gestures For Women* (Knopf, 1989) — hit the shelves in September to outstanding reviews.

Kauffman has graciously agreed to serve as the honorary chairperson for the upcoming Friends of the Library membership drive at Juniata. The "Friends" have been in existence since 1937, and during that time have made many valuable contributions to Beeghly Library, according to Peter Kupersmith, college librarian.

"The cost of books and journals has increased so drastically in recent years that it is virtually impossible for a college to support its library just from general revenues. Without support groups like the "Friends," the quality of service at the library would suffer," said Kupersmith.

Kupersmith added that for many years the library has counted on the generosity of the same loyal group, and now new "Friends" this year, and is also excited about the support being offered by Kauffman.

In a recent phone interview about her role in the membership drive Kauffman said, "The Friends of the Library is a major asset to Juniata and joining is one of the best ways for alumni, or anyone, to directly enrich the academic atmosphere for the students. The "Friends" provide features and extra resources for the library that many students can take advantage of during

their college years. I'm enthused about the Juniata Friends of the Library, and I know they will continue to be a very valuable resource for the college."

Kauffman, who has quickly risen within the literary world, writes "lovely, poetic stories about spiritually triumphant characters who move with the world, not against it," according to Lisa Failer in a review for **The Detroit Free Press**. "The stories are deeply affecting and lovely in their small observations," said **The San Francisco Chronicle's** Penelope Rowlands.

"The characters tend to have ordinary jobs. Yet there's nothing ordinary about them. As a group, they tend to be eerily observant, aware of the cycles of nature unfolding around them and conscious of the quirky mechanics of human behavior," wrote Rowlands.

"While (Kauffman's) most powerful stories take the farm as their setting and the land as their inspiration, the characters are apt to be found almost anywhere," explained Rowlands.

A farm setting, however, is a natural one for Kauffman since she grew up in Lancaster County, Pennsylvania, before coming to Huntingdon as a French/English major at Juniata. Today, her home is an 80-acre farm in Hudson, a small town near the Michigan-Ohio border.

After receiving her B.A. degree from Juniata in 1967, Kauffman got a taste of urban life when she completed postgraduate studies at the University of Chicago, earning an M.A. in 1968 and a Ph.D. in 1972. A Woodrow Wilson Fellow in 1967-68, she was a University Fellow from 1968-70 and began her teaching career at the University of Illinois, Chicago Circle in 1969-71.

She taught at Jackson (Mich.) Community College from 1976 until 1988 (except for 1984-85, when she was a visiting associate professor at the University of Michigan), and is currently in her second term teaching English, writing, and women's studies at Eastern Michigan University in Ypsilanti.

While her teaching experience has covered many areas of writing and literature, Kauffman's writing career began mostly as a poet. In 1978, a collection of her poems with Jerome McGann, entitled *Writing Home*, was published by Coldwater Press. Kauffman followed that with *The*

Weather Book (Texas Tech University Press) in 1981, a collection of poems that was an Associated Writing Programs Award Series Selection.

Kauffman's jump into the world of short stories came in 1983 with the publication of *Places In The World A Woman Could Walk* (Knopf), which received great reviews and was later the winner of the Rosenthal Award of the American Academy of Arts and Letters in 1985.

Following the success of her first collection of stories, Kauffman wrote the novel *Collaborators* (Knopf, 1986), which was nominated for a PEN/Faulkner Award. Two years later, *Where The World Is* (Montparnasse Press), a collection of poems was published.

Now, with the publication of *Obscene Gestures For Women*, Kauffman returns once again to the bookshelves and the pages of national book reviews.

Janet Kauffman is a name you should know, an author you should read.

Task Force Submits Report

The Task Force on Diversity in the Educational Environment has submitted a preliminary, draft report on its activities and recommendations to appropriate campus governing groups. The groups include administrators, alumni, trustees, and members of the community.

The charge of the task force has been to study the issue of diversity as it pertains to Juniata College, and to make recommendations regarding current or new programs. In particular, the task force has focused on minority issues including the recruitment and retention of students and faculty members, and the quality of interaction among the members of the campus community.

Prior to submitting the preliminary report, the task force met with minority alumni, conducted several sessions with trustees, held several on campus programs as a way of gathering information, and completed a series of surveys to obtain further data.

The final draft will be submitted, approved, and presented prior to the publication of the April issue of the Bulletin. A full report on the document will appear in our next issue.

Justice Robert E. Rose '61

Juniata Grad Elected Justice of Nevada Supreme Court

In January of 1989 Juniata graduate Robert E. Rose was sworn in as a Supreme Court Justice in the State of Nevada. He was elected to the Supreme Court in 1988.

A 1961 graduate of Juniata College, Rose earned honors in history, and received the Richard Simpson Memorial Scholarship his last two years at Juniata. He also served as the chairman of the campus judiciary.

After receiving his B.A. degree in 1961, Justice Rose went to New York University where he was a Root Tilden Scholarship recipient for three years. He received his LL.D degree in June of 1964.

Justice Rose began his distinguished career in law as a Nevada Supreme Court law clerk in August of 1964. In 1965 he began practicing law in Reno, Nevada with Goldwater, Taber and Hill. In 1970, Justice Rose was elected Washoe County District Attorney and served as D.A. from January 1971 until January 1975. In November of 1974 he was elected Lieutenant Governor of Nevada.

While serving as Lieutenant Governor, he also continued his private law practice, which he returned to full-time in 1979. He practiced law in Las Vegas at the firm of Cochraner and Rose until he was appointed to the Eighth Judicial District Court by former Governor of Nevada Richard Bryan in 1986. Until his election as a Supreme Court Justice in November of 1988, Justice Rose served as a District Court Judge.

LIFE IS DIFFERENT NOW FOR '73 GRADUATE

Barbara Gahan Gelnett '73

People from the Virginia Beach area enjoy a Friday night of music and ministry in the FIRE ESCAPE.

EDITOR'S NOTE: This article is reprinted with special permission from THE BEACON NEWS, Virginia Beach, Virginia. The story, written by Roberta Thisdell, staff writer for the Beacon, features Juniata alumna, Barbara Gahan Gelnett. Barbara and her husband, Stephen are 1973 graduates of Juniata College. Anyone interested in contacting the Gelnetts can call: (804) 498-3780, or write: 813 Biltmore Dr. Virginia Beach, VA 23454.

It's tough to be a Christian and a rock 'n' roller, but Barbara Gelnett believes it's possible.

At The Fire Escape on 17th Street, a soup kitchen and job bank for the homeless by day and a Christian coffeehouse by night, Gelnett books the bands that make the building rock.

At age 37, Gelnett looks 10 years younger and has the enthusiasm of a teenager when it comes to music that moves her. Being Christian and being a rocker should not be mutually exclusive, she believes.

"Rock 'n' roll is a part of my life," Gelnett said. "God would have to give me massive revelations, with thunder and lightning and the earth moving, for me to give it up."

At The Fire Escape, Gelnett still books acoustic acts traditionally associated with religious music, but finds herself fired up over local Christian rockers, groups like The Pro-Nouns, Freedom

and The Difference.

"I always loved rock music, always," she said. "But when I became a Christian, I found I didn't like the lyrics. I loved the sound, but I didn't like the message anymore. I can listen to other rock music and like the sound, but if the message doesn't build me up emotionally, spiritually, it's not enough."

She still finds a lure in the secular music, and ventures into neighboring clubs to hear local bands, particularly those that play original music.

"People say it to me, 'You need to distance yourself from that stuff,'" she said. "I go in Cafe Loco, and they'll even tease me, 'Aren't you afraid to be in this sinful atmosphere?'"

There are few Christian clubs around, just The Rock House in Tabb and Street Cry in Fredericksburg. National Christian rock acts — groups like Stryper, Petra and Mylon leFevre — are seldom heard on the radio.

"Rock stations won't play it because it's Christian," she said, "and the Christian stations won't play it because it's rock."

It's the same problem that the Fire Escape faces daily on 17th Street. Neighboring businesses aren't sure what to make of the street preachers

and street people who frequent the building, and churches aren't sure they want to support what they see as a rock club.

The First Assembly of God Church helps support the groups with a monthly donation, but Gelnett hopes to draw others in.

"They need to realize that the best way to reach people is through music," she said. "But a bunch of churches don't think you can rock and be a Christian."

To illustrate, she presents a Bible story, the tale of the prodigal son. When the wayward child came home his older brother was jealous because no one had ever thrown such a feast for him.

"Unfortunately, part of the church is like that oldest son," Gelnett said. "They don't think that all that rejoicing should be going on."

Mixing ministry and music has created a strange brew at The Fire Escape. A soda spilled during the soup kitchen ruined the club's sound board, and microphones mysteriously disappeared during another meal. Duffel bags toted by homeless people fill the storage room.

Club patrons include regulars and those who wander in off the street, drawn to a club that requires no ID and no cover charge. The surprises start when they try to order a beer and

find themselves holding a soda instead.

"Anyone who comes in off the street asks a lot of questions," she said.

" 'What's the story?' 'Why don't you serve alcohol?' "

Others are drawn to the music, Gelnett said. The Pro-Nouns, a rock group with members from Portsmouth and the Beach, seem to particularly attract the young skateboarding crowd.

"Rough kids from the street just love their music," she said. "It's got a thrash edge."

Gelnett knows all about the street.

As a teenager in Boston, she had her taste of high life, booze and drugs. When she was 20, vacationing on the New Jersey shore, she started questioning that life.

"I remember how seeking I was, looking for a boyfriend, looking for love, looking for acceptance, Gelnett said. "I met a guy, and we were smoking pot, round after round. We'd gotten kicked out of the rooming house, and we were sitting on a front porch.

"I had my tote bag full of drugs, my mescaline, my hash. This girl walked across the street toward us, crying, just blown out. I figured she was on bad drugs. That's what you always think when you're a druggie," Gelnett said.

"She started saying, 'Jesus, I've got to find Jesus.' And a group of people surrounded her and hugged her. I'd always thought religion was an intellectual thing. I couldn't believe all the emotion."

The next day, young Barbara Gelnett's new boyfriend left her, and she found herself thinking about the girl.

"I felt so bad, I was not getting what I needed," Gelnett said. "I started wondering about her, did she find what she was crying out for. It made such an impact."

The image lingered for years, through that time she sought those answers in Hinduism and yoga exercises, until the quest ended in 1977.

"People ask me when I was 'born again,' " she said with her ready laugh. "I figure it was the longest labor and delivery in history."

Gelnett got involved with the Fire Escape about three years ago, arriving at the club for the first time during the Monday night prayer meeting.

"They were really earnest, and I liked that," she said. "I thought I'd come down on the weekend, and I heard a Christian band playing rock music and I

Juniata alumna Barbara Gahan Gelnett talks with a homeless friend outside the FIRE ESCAPE after a Saturday afternoon meal.

said, 'I know this is the place for me.' "

Her new mission as volunteer club manager was made tougher by the lack of Christian rock bands who work for free.

"Something I prayed for consistently on Monday nights, was 'God, please rise up some bands,' " Gelnett said. "Somehow they appeared and worked for free."

The 17th Street club has been offering its combination of ministry and music since 1968, when it was The Upstairs, a Christian club sponsored by a group of Beach businessmen. Stan and Pam Majkut, Beach residents with ties to CBN, bought the club in 1974. The Majkuts still pay the bills and make decisions, but leave the daily work of

running the Fire Escape to others.

Along with her work at The Fire Escape, Gelnett has a family to worry about at her Hilltop home — husband Stephen and three children, Benjamin, 12, Alison, 10 and Jacob, 8. To pay the bills, Gelnett works as a teacher at a private Norfolk school.

"That's my job that pays," she said, looking around the clean, sunny room that is the Fire Escape. "But this is my career."

"There are a lot of people who get touched by what goes on up here that we never hear about. That's what keeps me going here, that someone might find what they need here."

With Christian Outreach running a daily soup kitchen and Mothers Inc. offering a daily job market, the building has been getting a great deal of use for

the past year.

Tops on Gelnett's prayer list these days is remodeling of the club. The glass front door is cracked, another window is mended with cardboard and tape. The black-and-white checkered linoleum floor is breaking up, and the bathrooms are a bare step up from those found in a bus terminal.

The soup kitchen may move when a permanent shelter is created for the homeless, but The Fire Escape will continue to help those in need.

"When someone who is hungry comes by, I'd like to be able to give them some food," Gelnett said, "I hate the thought of someone coming by a Christian establishment and going away without a meal."

ASF — For Future Generations

By Nan Hunt '56

Director of the Annual Support Fund

The Annual Support Fund Goal for the 1989-90 fiscal year is \$700,000. Under the leadership of Attorney David Andrews '74, ASF chairman, we are also shooting for an alumni participation rate of 43 percent this year.

By now you've received the brochure showing and explaining how the annual fund can mean the difference for future generations of Juniatiens. A recent alumni scholarship recipient, Christine Victor of North Versailles, a freshman at Juniata, also put it well.

"The first time I visited Juniata I felt as if I belonged. I was so impressed with the closeness of the school — so many traditions! I'm happy to say that I

haven't been disappointed. It is so important here to know that certain things will never change," she said.

Our challenge is to make sure the tradition of Juniata's excellence continues. To meet this demand will require more dollars.

We hope you will be part of this future by responding to the recent brochure; by sending that check to Juniata College when your class fund agent's letter arrives; or perhaps by establishing an annual scholarship to insure an education for some future Juniatian.

We ask that you contribute to keep Juniata the special place it is for many more generations.

Anna Groninger Smith Award Presented at Juniata

Juniata College announced the name of the first Anna Groninger Smith Supporting Staff Award recipient at the annual staff dinner this fall. The award winner for 1989 is Jodee Ruby, secretary to the college's vice president and dean of academic affairs.

The award, to be presented annually, was named for Anna Groninger Smith, who retired from the college in 1964 after serving 43 years as secretary to four presidents of the college. Mrs. Smith initially took a secretarial position at the college in 1921 to Dr. I. Harvey Brumbaugh, Juniata's fourth president, after attending Juniata's business school from 1919 to 1921.

She also served as secretary to former Pennsylvania governor Martin G. Brumbaugh, while he was president of the college from 1924-1930, and served as executive secretary to Dr. Charles C. Ellis, 1930-1943, and Dr. Calvert N. Ellis, 1943-1964.

Mrs. Ruby has served the college in various capacities for 16 years, beginning in 1973 as the faculty secretary to the natural sciences. In 1974 she accepted the position secretary to

President Robert W. Neff makes a presentation to Jodee Ruby, recipient of this year's Anna Groninger Smith Award, while Barbara Rowe, Director of Personnel Services looks on.

the dean of student services, and in 1978 moved into her current post.

In introducing Mrs. Ruby, Juniata president Robert W. Neff referred to her as someone who has "consistently demonstrated her enthusiasm for the values of Juniata College and represents the college positively both with college

staff and our various constituencies."

Mrs. Ruby, a resident of Mapleton Depot, is a graduate of Mt. Union High School. She is married to Larry Ruby and the couple has two children Jennifer, a freshman at Juniata, and Jeremy.

SPORTS

Juniata's five senior volleyball players display their NCAA trophy during the awards ceremony in St. Louis. The Indians compiled a 38-5 record and finished third nationally.

NCAA VOLLEYBALL

JUNIATA CELEBRATES FINAL FOUR APPEARANCE IN ST. LOUIS

Juniata closed another outstanding chapter in its women's volleyball history this fall with a third place finish in the NCAA Division III National Tournament.

The Tribe, which finished with a 38-5 record, won a ninth straight Middle Atlantic Conference championship to earn its ninth consecutive NCAA bid. Coach Larry Bock's squad also extended its winning streak to 114 consecutive matches over MAC opponents.

Juniata defeated Bridgewater and Cortland State to win the East regional championship at Kennedy Sports + Recreation Center and advance to a fifth straight national Final Four.

The Indians dropped a 3-0 semi-final decision to host and eventual national champion Washington University of St. Louis, but bounced back for a 3-1 consolation victory over Menlo (Calif.) to earn third place honors for the second straight year.

Senior setter Kris Withey of Baltimore was a member of the Final Four All-Tournament team. She was also a second-team All-American, first-team All-East pick and All-MAC.

Larry Bock, Tachikara NCAA Division III Coach-of-the-Year discusses the game plan with his team in St. Louis.

Senior middle hitter Rhonda Bygall of Brogue and senior outside hitter Melinda Selby of Elmora were first-team All-Americans, All-East and All-MAC. Classmates Angie Shue of York and Laurie Snow of Altoona received All-MAC honors as outside hitters.

Junior Michelle Wissinger of Johnstown was a regular as a defensive specialist along with sophomore Jennifer Tatum of Allentown. Sophomore Larissa Weimer of Altoona started at middle hitter while classmate Lee Ondrejack of Johnstown got valuable experience on the outside.

Bock, in his 13th season, was named Tachikara NCAA Division III National "Coach of the Year" by the American Volleyball Coaches Association for the second time in his career. He was also cited as East region "Coach of the Year" by the AVCA. Bock now sports a career coaching record of 462-89, including seven Final Four appearances.

Juniata was number-one in the NCAA Division III rankings for several weeks throughout the season, including the initial poll of the year, and never dropped lower than fourth.

FALL WRAP-UP

Football

Juniata shook off a tough start to win the final two contests of the 1989 season and conclude the season with a 2-8 record for first-year coach Brad Small. Three Juniata defeats came by five points or less, including a heart-breaking 13-10 loss to Moravian on the final play of the game.

After being shut out three times in the first six weeks, the Juniata offense kicked up in the closing four games as the defense began to stiffen. The Indians allowed just two scores in the final 10 quarters and earned victories over Wilkes (21-7) and St. Francis (41-0), the first shutout by Juniata since a 23-0 win at Randolph-Macon to open the 1987 campaign.

Preseason All-American running back Dennis DeRenzo of Reading set a new school record with 239 carries this fall and received honorable mention for the Middle Atlantic Conference All-Star team. He gained 859 yards rushing to push his career total to 2,095 yards, behind only DeWayne Rideout's 2,302 career yards. He was the team's leading scorer with 40 points.

Sophomore quarterback Jason Miller of Waverly, N.Y., took over the reins in week seven at Albright and just one game later threw for 323 yards at Susquehanna to become only the second sophomore and fifth Juniata player ever to throw for 300-plus yards in a game. He concluded the season 71-of-139 for 951 yards and five touchdowns.

Junior split end Ray Shelley was often spectacular in making a team-high 46 catches for 686 yards, the sixth-best season in both receptions and yards.

Senior co-captain Dan Crossey of Verona added 650 all-purpose yards this season to conclude his career second in that category with 2,915 yards. He finished sixth in rushing (1,520) and ninth in receiving (76 catches).

The offensive line was anchored by seniors Todd Ferrara of Hollidaysburg, a second team All-MAC pick, and John Sigler of Brodbeck's, who received All-MAC honorable mention.

The defense was led by sophomore strong safety Eric Little of Spring Grove with 69 tackles and five forced fumbles. Sophomore cornerback Brian Giachetti of Uniontown returned one of his three interceptions for a 41-yard touchdown against Wilkes.

These loyal Juniata Fans were among the students, alumni and administrators who traveled to Washington University of St. Louis for the NCAA volleyball finals.

Preseason All-American linebacker Steve Campbell of Mountville, a senior co-captain, battled a shoulder injury throughout the season but still recorded 61 tackles, plus tying for the team lead with four fumble recoveries and four interceptions. Senior Bryan Worner of Duncannon also had four interceptions.

Junior OLB Steve Brunner of West Reading led the defense with three quarterback sacks. Senior Jeff Haines of Clearfield anchored the defensive line with 30 tackles and one sack.

Senior John Spahr of Carlisle, who received All-MAC honorable mention, punted a school-record 78 times for 2,701 yards. He finished with 221 career punts, a Juniata record.

Junior kicker John O'Neill of Marlton, N.J., was five of seven on field goal tries and hit 10-of-13 extra point kicks to push his career totals to 34 PAT kicks and 16 field goals overall. Senior Keith Watson of Hollidaysburg handled the kickoff chores and concluded his career with 11 field goals, including a record 50-yard boot against Widener in 1988.

Cross Country

The Juniata women's cross country team concluded 1989 with a 4-3 dual record and a solid 13th place finish out of 21 teams at the Middle Atlantic Conference meet in Media. The men's team (1-5) was 22nd at MACs.

Coach Jim Payne's women's team was led throughout the fall by sophomore Kim Wurth of Norwichtown, Conn. Wurth crossed the finish line 20th overall in the MAC meet.

Senior Lisa Petersen of Pittsburgh, sophomores Jackie Calaboyias of Pittsburgh and Heidi Cullen of Kunkletown, and freshmen Teresa Richards of Lewistown and Sara Smith of Pelham, N.Y., rounded out the Juniata field in the MAC race.

Junior Andy Larmore of Wilmington, Del., finished first for Juniata in nine of 10 events this fall, including the MAC event.

Freshman Jeff Hetrick of Downingtown was right behind Larmore, followed by sophomores Eric Aschenbach of Hollidaysburg, Lance Marshall of Rochester, N.Y., and Matt Cain of Williamsburg.

Both rosters were dominated by underclassmen, and Payne is very excited about the future of the program. The women's team is ready to make a move into the top 10 in conference competition while the men are primed for a move to the middle of the pack.

Field Hockey

Juniata earned the second straight winning season for coach Kathi Quinn with a 9-3 finish this fall. The Tribe put together a record 12-3-1 campaign in 1988.

The 1989 team was ranked consistently throughout the season in both the NCAA and CFHCA polls as one of the top 11 teams in Pennsylvania. Only tough road losses at Messiah, F&M and Gettysburg kept Juniata from making the Middle Atlantic Conference playoffs.

Senior captain Kathleen McGowan of Bellmawr, N.J., team MVP for the second straight year, had a team-high 13 goals along with four assists this season and scored two goals in a game three times this fall. She is Juniata's career leader in goal-scoring with 38, including a school-record 16 in 1988.

Sophomore Carolyn Sheedy of Furlong received honorable mention on the All-Pennsylvania Region team and was a first-team All-Middle Atlantic Conference pick. She scored four goals this season from her midfielder spot.

Junior Amy Blough of Elizabethtown had one assist this fall and received All-MAC honors for the first time. She was All-Region a year ago at her defensive

spot.

Senior goalie Genny Warner of Hummelstown and junior Deb Dougherty of Biglerville combined to allow just 0.83 goals per game. Juniata recorded seven shutouts, including a school-record three in a row over York, Dickinson and Susquehanna.

Junior sweeper Jill Schadler of Perkiomenville had five defensive saves to push her career total to 29.

McGowan, Warner and Kris Shepardson of Southbury, Conn., are the only three seniors leaving the Juniata roster.

Soccer

After a promising 3-0 win in the season opener over Susquehanna, Juniata hoped its offensive problems of 1988 had been solved this fall. However, the Tribe offense disappeared through 12 consecutive losses when Juniata managed just one goal in a 4-1 loss to Dickinson during the eighth game of the season.

Despite the disappointment on the offensive end, first-year co-coaches Chris Noyes and John Mumford were pleased with their team's defensive work.

The play of senior goalie Tim Phelps

of Flourtown was outstanding as he recorded nearly 150 saves in his second straight season as the regular in the cage. Senior John Telenko of Elizabethtown was another leader on the defensive end from his sweeper position, and he also added an assist.

Senior Jeff Moseman of Quarryville was another contributor on defense from his midfield position and had a goal in the Susquehanna win. Classmates Doug Kovacs of Lawrenceville, N.J., and Bob Kelley of Keene, N.H., also concluded their careers. Kelley was one of the team's best offensive threats with one goal and two assists.

Leadership over the next several seasons could come from freshmen Steve Katsaros of Fallston, Md., and Alex Shubert of Elizabethtown, both regulars this fall.

The defensive emphasis should continue with the return of sophomore stopper John Bradway of Vineland, N.J., and classmate Steve Schierloh of Newton, N.J.

Junior Damian Preziosi of Califon, N.J., scored a goal this season and should help with the offense along with sophomore Derek Harkness of Columbia Cross Roads.

After a slow start in 1989, the Indian gridders came on strong near the end of the season. The Indians hope to charge into the next decade with much success.

JUNIATA'S LARRY BOCK IS FEATURED IN MAGAZINE

An interview with Juniata College women's volleyball coach Larry Bock is featured as the cover story in the December/January edition of "Coaching Volleyball", the official journal of the American Volleyball Coaches Association (AVCA). The magazine is distributed nationwide to nearly 3,000 men's and women's volleyball coaches at all levels of competition.

The article was written by Tom Hanlon, assistant editor of "Coaching Volleyball," which is published by Human Kinetics Publications of Champaign, Illinois. Hanlon was assisted in researching the story by Joe Scialabba, Juniata sports information director.

Hanlon begins the question-and-answer style article by pointing out that "Larry Bock is a good candidate for one of those American Express commercials. Relatively few people may know Larry Bock, but he happens to run one of the top Division III volleyball programs in the country," Hanlon writes.

Hanlon also discusses how Bock, a local banker with no previous coaching experience, took over the Juniata women's program in 1977 and led the Tribe to an 11-0 regular-season record in its first year of varsity competition. That's where the list of remarkable accomplishments began.

Since then, Bock's teams have produced a record of 462-89, nine straight Middle Atlantic Conference

championships, 114 consecutive MAC match victories, nine straight NCAA Division III tournament bids and seven Final Four finishes, including five in a row since 1985. The Tribe was Division III runner-up in 1981, and has finished in third place three times, including the past two seasons.

Bock has received national "Coach of the Year" honors three times, including being named AVCA/Tachikara NCAA Division III "Coach of the Year" this fall. He has twice been named Eastern region "Coach of the Year."

"By his own admission, he entered the coaching ranks as a 'neanderthal'; he was not merely an unknown, he was entering unknown territory. Bock's success story is one of those that you stumble across every once in awhile and shake your head," Hanlon writes.

He discusses how Bock has gone from a rookie coach with so many questions to a veteran coach with a lot of the answers. In the interview, Bock answers questions about Juniata's quick climb into the elite of Division III women's volleyball, the status of Eastern volleyball, and how he personally has gone from banker to nationally-known volleyball coach in this past decade.

Copies of "Coaching Volleyball" are available from Human Kinetics Publishers, Inc., Box 5076, Dept. 962, Champaign, Illinois 61825-5076; phone (800) 342-5457.

WINTER SPORTS UPDATE

Men's Basketball

Juniata headed into the holidays tied atop the Middle Atlantic Conference Northwest section standings with Elizabethtown. The Tribe was 3-1 in the league and 4-5 overall at semester break.

The Indians, looking for three consecutive winning seasons for the first time since 1968-71, opened the season with an impressive 78-68 overtime win over Glassboro State (N.J.) at the Frostburg State Tournament in Frostburg, Md. Juniata dropped a 59-71 decision to host Frostburg in the championship game before losing at Division II IUP (56-88) and at Division I Penn State (26-64) during Thanksgiving week.

The Tribe opened the league schedule with a 75-82 loss at Elizabethtown, but then put together a three-game section winning streak with wins at Lycoming (73-62), over Messiah (80-75), and over rival Susquehanna (76-69). The exciting victory over Susquehanna was Juniata's 12th straight home win and 22nd in the last 24 games at Kennedy Sports + Recreation Center.

Coach Dan Helm's team came up short in a controversial 57-58 non-league loss at Lebanon Valley before the Susquehanna victory. After junior forward Ron Benkovic of Steelton (Steel-High) hit a jumper with :05 left to give the Tribe a 57-56 lead Lebanon Valley took a timeout. Then, before Juniata broke its huddle, the officials put the ball back into play allowing the Dutchmen to go uncovered to take a winning bank shot at the buzzer.

However, the Tribe bounced back in the Susquehanna game to put together a very solid effort led by junior Jay Nicholson of Braddock (Churchill HS), who scored 23 points and grabbed 20 rebounds. Nicholson, a 6'5 center/forward and returning All-MAC and All-District pick, led the team at break with 17.1 points and 11.4 rebounds per game. He was selected to the All-Tournament team at Frostburg.

Senior co-captain Mike Welker of Altoona was averaging 14.0 points per game and topped the team with 17 three-point goals and 36 assists. Junior Donnie Wagner of Tyrone was scoring 11.2 points per game and had 31 assists. Benkovic, also an All-Tourney selection at Frostburg, had been impressive with

10.1 points and 7.6 rebounds a contest.

Senior co-captain Shawn Habakus of Mohnton (Governor Mifflin HS) missed two games with a separated shoulder but returned for the Susquehanna win. He scored 7.6 points a game and gathered 31 assists in seven starts.

The varsity reserve team took a 1-4 record into break after dropping three in a row (at Lebanon Valley, to Penn State-York, and at Mount Aloysius Junior College) following an exciting home win over Messiah.

Women's Basketball

Juniata began its break on a bright note after a fine performance at the Alfred University Tournament in New York. The Tribe finished second after losing a tough 74-64 decision to Utica in the championship finals.

Interim head coach Kelly Sparr's club defeated New England College 86-72 in the first round behind the record-breaking scoring of freshman Annette Hoffman of McClure (Indian Valley HS), who set a school mark for points on a neutral court with 30.

Hoffman, who led the team heading into the holidays with 18.3 points and 10.3 rebounds per game, was selected to the All-Tournament team along with sophomore guard Sherry DeAgostino of Altoona. DeAgostino was second on the team in scoring before the semester break with 15.4 points a contest.

Hoffman, who is eyeing DeAgostino's freshman scoring record of 346 points, has scored in double figures every game along with DeAgostino. Hoffman is shooting nearly 78 percent from the foul line.

DeAgostino is just 100 points shy of reaching the top 10 in career scoring at Juniata. She has recorded 41 assists while filling in for injured point guard Dana Patete of Hollidaysburg and has already canned 11 three-point goals, shooting 52 percent from three-point range.

Junior Pam Wyrick of Mohnton (Governor Mifflin HS) was averaging 11.3 points and 9.7 rebounds per game while sophomore Stephanie Haines of Holsopple (Conemaugh Twp. HS) was adding 8.3 points a game.

Wyrick, who was a District Two Academic All-American last season, jumped to sixth on the Juniata all-time career rebounding chart with a 389 total and should soon move into fifth place ahead of Jan Edgar's 404 mark.

Sophomore point guard Patete, who

set a new school record last season with 128 assists, had 22 assists in three games this year before going down with a severely sprained ankle. It was hoped she could be ready to return for the Juniata Tournament on Jan. 5-6.

Juniata (3-5 overall and 1-3 in the Middle Atlantic Conference Northwest section) defeated Messiah on the home boards before consecutive losses at Elizabethtown (58-74), at Lycoming (61-71), and to Susquehanna (68-70) in MAC play.

The Indians opened the season with a 1-1 record at the Marietta (Ohio) Tournament. Juniata lost to 1988-89 NCAA qualifier Centre (Kentucky) 48-79 in the first round but took consolation honors with a 62-54 win over Ohio Dominican.

Swimming

The women's swimming team started its vacation after getting off to a 3-2 start in 1989-90. The men were 1-3 at the break and had over a month to prepare for the next meet at Lycoming on Jan. 20.

The women put together wins over Lock Haven (142-110), Bethany (58-36), and Hiram (53-41), before losing decisions at Elizabethtown (78-112) and Susquehanna (76-118).

The men won over Hiram (50-44), but were edged by hosting Bethany (46-47). Coach Scott Preston's squad also lost at Elizabethtown (28-132) and at Susquehanna (66-91).

In the Susquehanna meet right before break at Selinsgrove, the Juniata women picked up three first-place finishes.

Sophomore Kathy Collins of Waverly, NY (Sayre, Pa. HS) took the 50 freestyle with a time of 28.57 seconds.

Sophomore Kim Cass of Lewisburg was the 100 butterfly winner in a time of 1:06.25. And, the 200 freestyle relay team of freshman Heather Berthold of Doylestown (CB West HS), Collins, sophomore Pam Ezdebski of Danville, and Elayne Steinman of Owings Mill, Md., crossed first in 1:55.44.

The Juniata men had four first-place performances at Susquehanna.

Sophomore Brad Newman of Carlisle won the 100 backstroke in 54.97 seconds. Sophomore Shawn Stafford of Uniontown was the winner in the 500 free while Alex Shubert of Elizabethtown took the 100 breaststroke in 1:09. The Tribe also took first place

points in the 200 freestyle relay.

Wrestling

Coach Bill Berrier's young squad opened the season with a 19th place finish at the annual Lebanon Valley Invitational in Annville. Freshman Ferris Crilly of Martinsburg (Central HS) was a place-winner for the Tribe with a seventh place finish thanks to a 3-2 record over the two-day event.

Juniata also completed one dual match before the holidays with visiting Susquehanna scoring a 25-9 victory over the Tribe at Kennedy Sports + Recreation Center.

The Tribe took three decisions on the day: sophomore Glenn Smith of Easton picked up a 19-15 win at 134 pounds, Crilly was a 4-3 winner at 142, and senior John Telenko of Elizabethtown scored a 7-2 victory at 167.

Juniata was set to resume its dual schedule on Jan. 24 at Gettysburg.

Individual records at break were:

- 118 Joe Sohmer of Lock Haven (1-3)
- 126 Colin Branton of Pen Argyl (1-3)
- 134 G. Smith (1-2)
- 142 Crilly (4-2)
- 150 D.J. Korlewitz of Johnstown (Westmont-Hilltop HS) (0-1)
- 158 Jim Weaver of Johnstown (Richland HS) (0-3)
- 167 Telenko (1-2)
- 177 Steve Manderbach of Leesport (Schuylkill Valley HS) (1-3)
- 190 Dave Bundy of Falls Creek (Dubois HS) (0-3)
- HWT Joe Kimmel of Hooversville (Conemaugh Twp HS) (0-3).

CLASS NOTES

26

Cora Pheasant has been living with her children. She is now 89 years old and in good health. Most of the time she stays with her daughter, Thelma McCall, at this address: R.D. #2, Box 353 B, Williamsburg, PA 16693.

29

Clarence and Pauline Snoeberger celebrated their 52nd wedding anniversary on April 1. They are residing in New Enterprise, PA.

30

REUNION '90 — May 18-20, 1990

Wilber J. Little and his wife spend three months in Phoenix, AZ, during the winter. They enjoy the remainder of the year in Iowa.

33

Rae E. Young retired in 1971 with 32 years of teaching elementary school, mainly grades 1, 2, and 3. She had five years of one room school teaching, grades 1 through 8. She now keeps very busy with church work and community activities while residing in Belleville, PA.

35

REUNION '90 — May 18-20, 1990

Eudora Meyers has received the Distinguished Alumni Award from Hollidaysburg Area School District where she taught for thirty-seven and a half years. She is also highly honored to serve as Consultant and Regional Representative for the Christian Business and Professional Women's Clubs of America, whose headquarters are at Stonecroft, Kansas City, Missouri.

OLLER'S PHOTO IN POPULAR BOOK

Have you read the book entitled "The Good Times" by Russell Baker, columnist for the New York Times? Juniata graduate Thelma Scott '38 identified Juniata alumnus, Jack Oller '23 on page 164 of that popular book. She wrote to the author and he confirmed that Mr. Oller was in the picture.

36

Ruth B. Marsh is still hanging in there! Seventeen of the "30 Gerties" got together again this summer at the Sherwood Knoll in Lancaster. They exchanged travel experiences and memories!

37

Miriam J. Bauer is now a retired teacher. She has a son who established the Apple Hill Outpatient Medical Center in York, PA, with his two sons now studying medicine.

Generations of JC Physicians Featured in Report

A Juniata College family is featured in the cover photo of the American Medical Association's annual report. The photo spotlights Dr. William B. West '27, his son, Dr. William J. West, Sr. '56 and his wife, Dr. Joyce W. West '56 and their son, Dr. William J. West, Jr. '82. The AMA report entitled "Members Making a Difference," credits the West family with giving "special meaning to the term 'family medicine.' "

39

D. Wilson Crazer retired as the assistant to the Executive Minister of American Baptist Churches of New Hampshire. Since February 1, 1989, he and his wife have resided in Grantville, PA. He has retired three times now and thinks this one is it!

C. Blanche Milligan has retired after 49 years of teaching. She was recognized in May as honorary senior Mrs. Founders Day 1989 at the Belleview, PA Founder's Day celebration. The yearbook at the school where she taught was dedicated to Ms. Milligan for her outstanding devotion.

40

REUNION '90 — May 18-20, 1990

Lois M. Anderson had her Chinese brush paintings and scrolls on exhibit at the Harvard Institute of Learning in Retirement on the Campus during the month of May. Her hand painted cards are now at the gift shop at the Museum of Fine Arts in Boston.

41

Augusta Morgan is now living in Palatka, Florida, and is serving as President of a local unit of Florida Retired Educators, known as P.C.R.E.A. (Putnam Company of Retired Educators Association).

42

Charles Q. Griffith, M.D. retired as of August 1985, and is keeping very busy with reading, hiking, hunting, fishing, and photography. He hopes to see some classmates at reunion in 1992!

45

REUNION '90 — May 18-20, 1990

Barbara A. Boyd continues to work with Intersarsity Christian Fellowship which she has been a member of since 1950.

46

Elizabeth Ann Shaffer is now retired from teaching French and Spanish at Pfeiffer College. She retires with emerita status and resides in Misenheimer, NC.

48

James N. Stroh retires after 40 years of service as a minister in The United Methodist Church in Friedens, PA.

49

Warren F. Groff is now a retired President of Bethany College, but will remain at Bethany for the next year doing miscellaneous things.

Dr. Richard March and June (Cave) March live in retirement on the New Jersey shore. Richard retired from Fisher Scientific as a Microbiologist, and June retired from the Ramopa Central School District as a School Community Counselor in Suffern, NY.

50

REUNION '90 — May 18-20, 1990

Thomas E. Shoemaker served as part-time interim chaplain at Woodrow Wilson Rehabilitation Center from December 1988, to August 1989. This is in addition to his regular duties as a Vocational Rehabilitation Counselor.

Sara Gantt Miller retired from the West Perry School District after 30 years, and her husband, Bruce, retired from Carson Long Institute after 26 years. They are now so busy with projects, they don't know how they ever had time to work! Two of their

children live in South Carolina, and the other lives near them in New Bloomfield, PA. They also have 5 grandchildren.

A. Robert Smith left newspapering five years ago to launch a magazine, called *Venture Inward*, in the metaphysical field.

John C. Stayer retired June 30 as Credit Club Consumer Discount Company manager at Swigart's Associates Inc. He served this company for 39 years. During retirement, the Stayers plan to catch up on many of their favorite outdoor activities.

51

S. Ray Hollinger is President of the Westminster Company, a 50 year member of the Carroll County (MD) Chamber of Commerce.

52

Joyce Grove Ellinger has lived in Huntingdon for the last 25 years. She is currently the chairwoman of Huntingdon County Children's Services Advisory Board and serving on the board of Huntingdon House, a program for domestic violence. She also is especially enjoying being a grandmother for the first time.

53

Phyllis R. Link Randall just published *Caryl Churchill: A Case Book*. It is a book of essays about the contemporary English playwright. She also recently published an essay on American playwright Sam Shepard.

55

REUNION '90 — May 18-20, 1990

Phyllis N. Decato is now managing a retail fabric business. She is sewing more now than ever and is back to designing dance costumes for her daughter's dance students at Lake Erie College.

Fred Heydrick retired from the U.S. Government and the National Institute of Health in June. He has founded BioReview Inc., with offices in Rockville, MD. He and his wife Maggi, enjoy sailing on the Chesapeake Bay and travelling.

56

Pat McCordle Brown, pursuing her historical interests, toured several Civil War battle fields and homes of former U.S. Presidents on a trip to Arkansas to visit with her 6 year old grandson, Timothy.

William J. Collins now serves as the

Associate Dean of the Graduate School at Ohio State. His daughter, Roberta, was married last October.

Howard Kerstetter went to South America where he became interested in raising llamas. He is now raising llamas himself.

57

Eloise H. Douds is the new chairperson for the Policy Board responsible for staff development in Northern Westchester Putnam Teacher's Center (a ten school consortium).

Mary A. Johnson has spent 28 out of the last 32 years teaching in the Tussey Mountain School District, Saxton. She has served on and helped to develop a variety of curriculum packages and Long Range Curriculum with staff, and was part of a committee to work on and develop ACT 178 Professional Development Proposal submitted to and approved by the State Education Department. Since 1985, she has served as the Tussey Mountain Education Association treasurer.

Phyllis M. Omenson has been married to husband Allan for 26 years this past August. She still owns her women's sportswear business (MARK ROSS WHOLESALE APPAREL) in Cherry Hill. She is still

tutoring Spanish at home. Her daughter Rachel graduated from R.I.T. and is a newspaper photographer. Her other daughter, Lynne, is a student at Towson S.U. in Maryland and studying mass communications. Phyllis herself has just started taking piano lessons.

James Corrigan was the President for Pima County Medical Society in 1988. His wife, **Carolyn Corrigan**, was the President of Arizona Medical Association Auxiliary from 1988-89.

58

Phillip M. Stefanini has received his M.B.A. from Temple University and is the Director of Corporate Affairs at the Rohm and Haas Company.

Lillian Weimer Walters has begun as Director of the Zwingli Church Nursery School in Sellersville, PA.

59

Edward Edenfield has a new job as a Field Supervisor for Impact Exhibits/Builder. He also has his first grandchild, J. Tyler, born on December 27, 1988.

Judy (Barrowclough) Taylor is the assistant principal of the Humble Elementary School in Humble, TX. She loves her job, still loves J.C., and she and husband, Bruce, are building themselves a "vacation" home, which is almost complete.

60

REUNION '90 — May 18-20, 1990

"Barney" McLaughlin is presently serving on the Forest Hills Council.

Dr. Herbert J. Sipe, Jr. has continued his research association with the Laboratory of Molecular Biophysics of the National Institute of Environmental Health Sciences at Research Triangle Park, NC.

62

Kathleen Strang sang in the Battle Creek Community Chorus performing two shows of the musical revue "Side by Side by Sondheim."

63

R. Wayne Barnes is President of Barnes-Bollinger Insurance Services Inc., a local independent insurance agency in Westminster, MD.

CELEBRATE WITH ALL GENERATIONS OF ALUMNI

AT REUNION WEEKEND 1990

★ MAY 18-20 ★

65

REUNION '90 — May 18-20, 1990

A. William Asendorf is now the Director of Training and Development for Rudolph/Libbe, Inc., a large general contractor. He has also owned a picture framing business for the past 3 years.

Abbey Frank Bradway is presently serving her clinical internship in preparation for receiving her M.S. in Pastoral Counseling

Juniata College Honor Society

Were you a member of the JC Honor Society?

The Juniata College Museum needs original or copies of programs of the annual dinner induction meeting for the following years:

1943 to 1949; 1954 to 1956; and
1961 to 1967

If you have one of these programs and are willing to part with it the college museum would appreciate being able to add it to its collection. A copy of the information would be appreciated, at least. The society is gathering information for a 50 year history of the Society for its anniversary in 1991. A fuller story of the honor society will be forthcoming.

Address your replies to: Harold B. Brumbaugh, Juniata College, Huntingdon, PA 16652.

from Neumann College in May 1990.

66

Dr. Thomas B. Robinson has been appointed as vice president for student affairs of California State Polytechnic University.

67

Janet Kauffman received a favorable review for her new collection of short stories in the September 24, 1989 edition of the *New York Times Book Review*.

68

Robert C. Gerhard, Jr. is serving his third term as Commissioner for Cheltenham Township, Montgomery County, PA. He was also elected as vice president of Pennsylvania State Association for Township Commissioners and as vice president for the Chesapeake Bay Local Government Advisory Committee for Pennsylvania.

Dr. Charles R. Lytle manages the Portland, Oregon office of PTI Environmental Services, an environmental consulting firm that works for client companies involved in superfund hazardous waste site clean-up. He has recently been elected as "Fellow" of the Institute of Science, Engineering, and Public Policy.

69

William G. Foster has been added to the financial management staff at St. Agnes Hospital where he will head the Patient Accounting and Admitting Departments.

70

REUNION '90 — May 18-20, 1990

Joanne Finn has completed her second Masters degree at Syracuse University in School Psychology. She is working as a School Psychologist for the Cortland City School District.

71

Larry Carbonetti has been selected as a "Vermont Outstanding Teacher" by the Vermont State Department of Education. It was his third teacher of the year award. He was selected twice in New Jersey.

72

Dr. George F. "Jody" Harpster has been elected President of the North Carolina College Personnel Association, a state division of the American College Personnel Association, for the 1989-90 academic year. Dr. Harpster and his wife, Leslie, live just outside the city of Charlotte in the University City area where Jody is active in the community.

Maurice C. Taylor received his Juris Doctor degree in May, awarded by Duke University.

73

Owen and Mary Thomsen have moved to Mission Viejo, California, where Owen is working for Southern California Edison as a supervisor in the Nuclear Engineering and Construction Division.

Scott Williams has been appointed District Manager of Commercial Underwriting for GRE America Insurance in Cincinnati, Ohio.

74

Daniel Herzog has been hired as a part-time Consultant at Savoyard Postal History, Mt. Vernon, NY.

Christopher James and family have just moved back from the Netherlands, where Christopher is the manager of European Clinical Affairs for Centocor B.V., a U.S.-based pharmaceutical company.

Nancy E. Van Antwerp and husband Ken have three children, two daughters with their newest addition being a son.

Ronald D. Walters, M.D. is happy to announce that Carl S. Colombo, D.O., has joined his association for the practice of Internal Medicine.

Keith S. Willis and his wife Cameron have moved to Rockford, IL, where Keith is an accountant representative for Worthington Industries.

75

REUNION '90 — May 18-20, 1990

William R. Carpenter has received the North Penn area police chief's Law Enforcement Man of the Year award.

Bonnie K. Risser became Branch Manager for the Martinsburg Office of Altoona Federal Savings and Loan Association.

Henry F. Siedzikowski is now the managing shareholder in the 75-a Harney Philadelphia

Office of Baskin Flahartz Elliot and Manning P.C.

76

Mark R. Henry has successfully completed his first year at the College of Medicine in Hershey.

Diane Lindstrom has received her M.S. degree in Biology from Villanova University in May of 1988.

R. Thomas Metz has accepted a new position with Paine Webber Inc. in Pittsburgh, PA.

Jeffery J. Wood has become a principal partner in the law firm of Rudnitsky & Hackman, P.C., now RUDNITSKY, HACKMAN & WOOD, P.C. He practiced law in Slippery Rock for five years before relocating to Selinsgrove, PA.

Philadelphia Golf Outing

Fore! The greater Philadelphia Alumni of Juniata got together at the Yardley Country Club for a great day of golf and outstanding dinner. Bruce Sickel '82, the president of the group, enlisted the enthusiastic help of Eileen & Bob Sill '57-'59 and Chuck Mullen '57 to host the event in Yardley.

It was apparent from the turnout of 30+ that this annual event is becoming more popular every year. At the dinner, Shawn Mullen '80 was named president and coordinator for the Philly Golf Outing in the spring of '90. Watch for details!

77

Marsha Durst Queer is pleased to announce that her Bernese Mountain Dog achieved his first obedience title in May.

Nancy L. Stone has been elected to the post of assistant secretary of commercial lines services by the board of directors of the Harleysville Mutual Insurance Company.

78

Dr. Newell Bascomb has been promoted to Principal Scientist and is now Coordinator of the Protein Targeting Group at Enichem Americas in Princeton, NJ.

Donna Caton Bascomb is an employee of Squibb Corporation, also based in Princeton.

Drew A. Koch has completed a two-year emergency medical residency at Memorial Hospital in York, PA. He plans to work as a

staff physician for the Department of Emergency and Trauma Medicine at the Polyclinic Medical Center in Harrisburg, PA.

79

Bob McMinn left the position of Office Manager at Valley REC to begin studies at the Duquesne University School of Law.

80

REUNION '90 — May 18-20, 1990

Cathleen M. Connell, Ph.D. is an Assistant Professor in Health Behavior and Health Education at the University of Michigan.

Marcia R. MacKellar has begun a career as a free-lance writer and has been published locally and nationally. This includes an article in the September 1989 issue of *Baby Talk* magazine, a major national parenting publication.

Dr. John F. Mills recently completed his residency in Family Practice at Conemaugh Valley Memorial Hospital in Johnstown, PA. He has also joined the staff at Norland Family Practice in Chambersburg, PA. His wife Bonnie is a registered nurse at the Carlisle Hospital.

Douglas P. Wood is still teaching and coaching at Knoch High School in Southern Butler County. His wife Kathy is a teacher and a coach at the Butler County Community College.

Taeho Oh, M.S. is the Assistant Director of the Department of Pharmacy at Mount Sinai Medical Center in Miami Beach, FL. He is also an Assistant Professor at Southeastern University of the Health Sciences College of Pharmacy in North Miami Beach, FL, and a Clinical Assistant Professor at the University of Florida College of Pharmacy in Gainesville, FL.

81

Carol A. (Hart) Chapman was one of 221 graduates who received a Doctor of Medicine degree at the 165th commencement of Jefferson Medical College, Thomas Jefferson University, Philadelphia, PA.

Capt. Sharon L. Decker helped implement the successful automated mission planning system at Air Force Tactical Command.

Dr. Duane P. Dilling has accepted an appointment on the Northern Bedford School Board.

Joy E. Sill-Hopkins is the newest member of the John Waters Team. She serves as a committee chairperson for her Chamber of Commerce, is a spokesperson for the International Association of Financial Planners, and is an assistant manager of a softball club, and is a volunteer member of the Lion's Club.

Valerie Reynolds and her family have moved to Omaha, NE, and have hosted a student from France for a second year.

ALUMNA DONATES HOME TO HISTORICAL SOCIETY

Miss Rello Oller '20, has donated her Victorian home to the Waynesboro Historical society as a headquarters. The Board of Directors of the Society accepted her proposal at their regular meeting in July. The sixteen-room dwelling house was built in 1891-92 for J.J. Oller, Rello's father. According to a recent society newsletter, Miss Oller's gift fulfills a profound need for the Historical Society, which for a number of years has been obliged to hold its functions in borrowed rooms.

82

Jeanne Bennardo received her Masters degree in Public Management and Policy from the School of Urban and Public Affairs at Carnegie Mellon University on May 21, 1989. She graduated with distinction.

Cathy Lynne Bracciale has recently been promoted to Senior Financial Statement Analyst for Mellon Bank Central NA. in the Indirect Lending Department.

Catherine Buckler is still working at Youth for Understanding International Exchange as Assistant Registrar.

Dr. Michael W. Pelter has been appointed Visiting Assistant Professor of Chemistry at the University of Southern Colorado. Aside from biking and hiking in the Rocky Mountains, his recreational activities include being a rugby referee in the Eastern Rockies Rugby Football Union.

Nancy Corbin Spaulding was promoted to assistant Vice President and Trust Officer at Summit Trust Company in Morristown, NJ.

Karl E. Umble is working at the Virginia Department of Health in the Office of Health Education and Information. He is doing preventive health education planning and consulting.

Margot L. Waitz has received a Doctor of Osteopathy degree from the Philadelphia College of Osteopathic Medicine.

83

William Boswell has been promoted to Senior Engineer in the Acquisition Software Section within the Special Systems Software Department of HRB Systems.

William K. Hallman has received a Ph.D. from the University of South Carolina in Social Psychology. He is now an assistant professor in the School of Human Ecology at Rutgers University teaching environmental courses.

Dr. Franz-Josef Meiers and Gisela (Joeris) Meiers have moved to Geneva, Switzerland where Franz-Josef took up the position as the assistant to the director at the Graduate Institute of International Studies.

Carlton E. and Beth S. Surbeck are residing in Boalsburg, PA. Carlton is the Associate Director of Admissions at Juniata College, and Beth is a graduate student at Penn State. She is working toward a Ph.D. in Psychology and Counseling.

Edward J. Trowbridge, D.P.M. is pleased to announce the opening of his private practice, Huntingdon Foot Care, located in Huntingdon, PA.

84

Kip R. Benko received a Doctor of Medicine degree from Georgetown University.

DeeAnn Nokovich Gehlauf has recently completed her doctoral degree in Industrial/Organizational Psychology at Ohio University. Since graduation, she has taken a position at Ohio University Zanesville and will be teaching a variety of psychology courses.

Daniel Vukmer is the President and owner of Core Technology, Inc. in Frederick MD. He is also currently a Staff Consultant at INTELSAT (International Telecommunications & Satellite Organization) in Washington, D.C.

85

REUNION '90 — May 18-20, 1990

Dr. John Burr has received a Doctor of Medicine degree from the University of Pennsylvania's School of Medicine, Philadelphia.

Andrew Davis is now working at Viking Penguin Inc., in New York, as Assistant to the Vice President of Production.

Eric K. Fowler, M.D. graduated from Jefferson University on June 9, 1989. He is currently fulfilling his family practice residency requirements at Lancaster General Hospital.

Jeffery J. Meter recently received a Doctor of Medicine degree from the Hahneman University School of Medicine in Philadelphia.

Richard J. Noll has recently graduated from Temple University School of Medicine and will commence his residency at the Reading Hospital and Medical Center in the Specialty of Obstetrics and Gynecology.

Anne E. Pfeiffer has moved to South Carolina with her fiancé. They live very close to Shaw Air Force Base and would love to hear from anyone in the area.

Patricia M. Ryan is currently the Chief Executive Officer of Rocky Mountain Rehabilitation Institute in Aurora, CO.

Scott Alan Sauerwine received a Doctor of Medicine degree from Jefferson Medical College, Thomas Jefferson University in Philadelphia, PA. He plans to begin a three-year residency program in internal medicine at the Mayo Clinic, Rochester, Minnesota.

Seattle Alumni Gather Before Game

Richard L. Moll '60 and his wife, Helen, who recently relocated to the Seattle, WA area, coordinated an alumni gathering in Bellevue on October 28, 1989. The 21 alumni and friends who gathered enjoyed great fellowship, heard remarks about Juniata from Clay Pheasant, Vice President for College Advancement, and F. Sam Brumbaugh, Alumni Trustee from Pen Argyl, PA.

Moll reports, "You certainly could feel the energy our assembly had towards our Juniata experience. Being so far away from Huntingdon, it was good to hear observations of Juniata's current activity and future plans. Sam Brumbaugh appeared to enjoy himself and also did a great job in sharing the trustees' role in developing an expanding humanities program at the college."

A highlight of the evening, was a special appearance by Chuck Knox '54, head coach of the Seattle Seahawks. Moll reports, "Chuck Knox did a fine job in sharing his coaching experience and being a part of Juniata. The coach is a winner. He works in a fast-lane line of work and upholds a very high standard of personal performance. It was a delight to have Chuck and Shirley join us."

Tina Marie Snowberger received a Doctor of Osteopathy degree from the Philadelphia College of Osteopathic Medicine.

Susan S. Vehse received an M.A. in Reading from West Virginia University this past August, 1989.

Robert J. Wetzel recently received a Doctor of Medicine degree from the Hahnemann University School of Medicine in Pennsylvania. He will complete an obstetrics and gynecology residency at Kessler Air Force Base, Biloxi, Mississippi.

86

Anna L. Bossler: Research Technician, Wistar Institute, 36 & Spruce Room 352, Philadelphia, PA 19104; r. 411 S. 42nd Street #103, Philadelphia, PA 19104.

Laureen M. Boyer: Graduate student at West Virginia University — Communications; r.

404 Baird Street, Morgantown, WV 26505 / she is also working as a graduate teaching assistant in the communications department.

Melinda Brandt: r. RD 1 Box 74, Hershey, PA 17033.

Pauline A. Brandt: Copywriter, Schum & Stober, 1750 Old Meadow Road, McLean, VA 22101; r. 19344 Frenchton Place, Gaithersburg, MD 20879.

Karen K. (Brubaker) Wilson: Chemistry teacher, Central High School Prince George's County Schools, 200 Cabin Branch Road, Capitol Heights, MD 20743; r. 9 Sulky Court Apt. T-1, Randallstown, MD 21133 / Karen Married Timothy G. Wilson on July 29, 1989.

Jeffrey R. Buehler: r. CMS Box 1076, Rutgers University, 326 Penn Street, Camden, NJ 08102.

John Bunnell: r. temporary address 326 Penwyllt, Exton, PA 19341 / John will begin graduate school in the fall of 1990.

Cynthia A. Burgo: Graduate student at University of Pittsburgh — Genetic Counseling; r. 905 Maryland Avenue Apt. 4, Pittsburgh, PA 15232.

Cherie L. Byars: Laboratory Technician, Johns Hopkins University School of Medicine, Developmental Genetics Lab, 725 E. Wolfe Street Room 208, Baltimore, MD 21205; r. 1500 Wood Heights Avenue, Baltimore, MD 21211.

Barbara A. Carlisle: Kindergarten Teacher, Columbia Park Elementary School, 1901 Kent Village Drive, Landover, MD 20785; r. 10021 Greenbelt Road Apt. 201, Lanham, MD 20706.

Lynda M. Cass: Graduate student at Widener University School of Law, Delaware Campus, PO Box 7474 Concord Pike, Wilmington DE 19803-0474; r. 1 Glennoll Drive, Chadds Ford, PA 19317 / Special thanks to Dr. Thomas Baldino, Charles B. Swigart, Esq., and David P. Andrews, Esq. for helping me get into Law School!

Charles A. Cummings: Field chemist, Eastern Chemical Waste Systems, 1525 W. Street NE, Washington, DC; r. 103 E. Raymond Avenue, Alexandria, VA 22301.

Amedeo A. Cianci: Accountant, Weightman Group, 1818 Market Street, Philadelphia, PA; r. 546 Hazel Avenue, Folsom, PA 19033.

Steven K. Costalas: Graduate student at Philadelphia College of Osteopathic Medicine, 4150 City Avenue, Philadelphia

19131; r. 2634 Parma Road, Philadelphia, PA 19131.

Michael Cottle: r. RD 1 Box 198, Everett, PA 15537.

Timothy M. Crowley: USMC, Lt — Infantry; r. E Co. TBS, MCCDC, Quantico, VA 22134 / having fun running through the woods playing Marine.

Christopher M. Davis: Assistant Manager Financial Representative, American General Corporation, 410 E. Plank Road, Altoona, PA; r. 212 Leaf Lane, Hollidaysburg, PA 16648.

Joseph L. DeBlase: Junior High Math Teacher/Basketball coach, Somerset School District, Somerset, PA 15501; r. 531 Mississippi Street, Boswell, PA 15531.

Duane E. Dise: Dock clerk, Roadway; r. 306 Cherry Street, York, PA 17402.

Lisa A. Dorn: r. PO Box 244, Townsends Inlet, NJ 08243.

Jean M. Drumheiser: r. 57 School Lane, Orbisonia, PA 19551.

Stephanie A. Dunkle: Field Director/Training Specialist, Hemlock Girl Scout Council, Lewistown Service Center, Lewistown, PA; PO Box 157, Huntingdon, PA 16652.

Donna (Eaton) Henry: r. 19 Seventh Avenue, Fort Rucker, AL 36362 / Donna got married on June 17, 1989 to Todd M. Henry, a graduate of the U.S. Military Academy. They are stationed in Alabama.

Kimberly J. Esh: Graduate student — Family Medicine, Penn State Med. School at Hershey, Apt. 127 University Manor East, Hershey, PA 17033; r. RD 2 Box 66, Belleville, PA 17004.

Kelliann Fahey: Domestic Relations Officer, Delaware County Court House, Media, PA; r. 508 Tasker Street, Ridley Park, PA 19078.

Dawn Ann Fine: Graduate student — Psychology, Hood College, Frederick, MD 21701; r. 4990 Woodhirst Drive, Frederick, MD 21701.

Brent D. Flickinger: Graduate student — Nutritional Sciences; University of Illinois, Urbana, IL 61801; r. 121 South Fourth Street, Newport, PA 17074.

David Fouse: Press Officer, Public Relations Office, Habitat for Humanity International, Habitat and Church Streets, Americus, GA 31709-3498.

Christopher J. Frank: Graduate student —

Analytical Chemistry, Ohio State University,
120 W. 18th Avenue, Columbus, OH 43210;
r. 140 W. 18th Avenue, Columbus, OH 43210
/ Good Luck to the Class of '89!

Frank Gay: r. 308 Regor Road, Conamaugh,
PA 15909.

Kimberly S. Glaude: Graduate student —
Fine Arts, Tafts University, MA; r. Apt. 5,
240 Kelton Street, Brighton, MA 02135.

Diana K. Gough: Biological Laboratory
Technician, U.S. Department of Agriculture,
Agricultural Research Service, Rm. 208, Bldg.
004 BARC-WEST, Beltsville, MD 20705; r.
10912 Brookwood Avenue, Upper Marlboro,
MD 20772.

Michael P. Gress: Graduate student —
Dentistry, West Virginia University School of
Dentistry, 1064 Van Norrhis Road, Apt.
J-210, Morgantown, WV 26505; r. RD 5 Box
385, Meadow Drive, Johnstown, PA 15905.

Debra L. Griest: r. 3150 Nova Scotia Road,
Bel Air, MD 21014.

for Hazardous Materials Research, 320
William Pitt Way, UPARC, Pittsburgh, PA
15238; r. 3540 Wayne Road, Munhall, PA
15120.

Paul A. Hayduk, Jr.: r. 16807 Westbourne
Terrace, Gaithersburg, MD 20878.

Blair/Bedford Alumni Picnic

A special thanks to Bruce Erb '76 for
coordinating the annual Blair/Bedford
picnic at the summer home of Joe and
Jane Good. On this hot summer
afternoon the pool was a welcome
respite. The tantalizing smell from the
meat cooking on open charcoal grills
called the group together to enjoy a
wonderful meal by Juniata College Dining
Service. Hats off to Joe and Jane who
have hosted this picnic long enough that
they think people would not want to
come — NOT TRUE! Especially the recent
alumni expressed their strong desire to
return. Several alumni will meet to
reorganize the Blair/Bedford club officers
at a later date.

ALUMNI COUNCIL EXECUTIVE COMMITTEE

OFFICERS OF THE ALUMNI COUNCIL:

LINDA U. PHELPS '66
President
217 Sunnybrook Road
Flourtown, PA 19031
(215) 233-2903 (h)

MICHAEL D. BUSCH '77
Vice President
500 Spring Run Drive
Monroeville, PA 15146
(412) 372-5253 (h)
(412) 578-6902 (o)

ALICEANN WOHLBRUCK '58
Past President
3212 Oliver Street, NW
Washington, DC 20015
(202) 362-8983 (h)
(202) 624-7806 (o)

DOROTHY L. HERSHBERGER '50
Secretary
RD 2 Deerwalk
Martinsburg, PA 16662
(814) 793-2522 (h)

James S. McGinnis '87 married Emilie Ent '89 on July 16, 1988. The couple resides in Mechanicsburg, PA.

Donne E. Eaton '89 recently married Military Academy grad Todd M. Henry. The couple is stationed in Alabama.

Timothy G. Wilson '89 and Karen K. Brubaker '89 were married on July 29, 1989. The couple is residing in Maryland.

Rev. John R. Rodland '61

JC Graduate Will Be Missed

The Rev. John R. Rodland, associate pastor and minister of music at the West Side Presbyterian Church, died in Ridgewood, New Jersey on October 17 following an extended illness. He was 49.

A graduate of Juniata College, Mr. Rodland received his masters degree in sacred music, summa cum laude, from Union Theological Seminary in New York City.

Mr. Rodland, who served as a church organist and director since the age of 14, practiced his belief which he described as "an important vehicle to carry God's work to people, to enrich their lives and, maybe as much as anything, for drawing people together."

He fulfilled his credo by bringing to Ridgewood, the surrounding communities, and to everyone he met a love for music which embraced people of all ages and churches of all denominations, said Stephen D. Geckler, senior pastor of West Side Church. "Our job," Mr. Rodland has said, "is to make life a little more beautiful for people."

In 1980 he completed his master of divinity degree and was ordained by

the Presbytery of the Palisades in New Jersey, adding the duties of pastoral care to those of minister of music.

Mr. Rodland dedicated himself to the total worship environment of the church and was especially knowledgeable in the field of hymnody.

One of his last major tasks was the revision of the Presbyterian Hymnbook as a member of the Hymnbook Committee of the Presbyterian Church U.S.A. The new book is to be published in 1990.

Not only has he guided the building of and dedicated the organs of many churches of all denominations in the Metropolitan area, he was the guiding spirit in the three-day, 14-concert Ridgewood Bach Festival in 1985.

Mr. Rodland's last public appearance was as director and organist at the New Jersey Convention of the American Guild of Organists' Hymn Festival held June 26 at West Side Church.

He is survived by his wife Joanne, his daughter Catherine, currently pursuing her doctorate in organ performance at the Eastman School of Music; and daughter Carol, a violist currently at the Juilliard School of Music. He also leaves his mother, Mildred Leona Taylor of Altoona and his father, Merle Rodland of Florida.

The memorial service was held at the West Side Presbyterian Church in Ridgewood on October 29. A song was written for the memorial service by Brian Wren and Richard E. Frey in honor of Mr. Rodland. The hymn is entitled "Birth To Resurrection."

All memorial gifts were sent to the West Side Special Music Fund.

In Memoriam

Reading is Ready!

Saturday, October 21, 1989, marked the "Kick Off" of the Reading Area Alumni Association. During the "Pre-Game Warm-Up," several Alumni from various classes met to discuss the official formation of the club and future events which would be of interest to the group. Another highlight of the meeting was Coach Brad Small's strategy for the J.C. Indians' afternoon gridiron match up against the Albright Lions. The Indians didn't fare well against the Lions, however, the J.C. spirit is alive and kicking in Reading!

Class Notes

Juniata is always looking for news of its alumni: promotions, degrees, job changes, honors, marriages, births, etc., even an address change. If you fit the bill — or would like to report on a friend — please complete this form and return it to the office of Alumni Relations. We encourage you to send photos (black and white) with your news.

Birth Announcements

Rev. Dr. John W. Lowe, Jr. '66 and wife, Lorna, announce the birth of Tina Kathryn Lowe on November 24, 1988.

Gene Galbraith '70 announces the arrival of his new son, Joshua Tyler Galbraith on April 18, 1989.

William F. MacArthur '70 and wife, Beth, announce the birth of their first child, a son, Daniel John MacArthur, on May 17, 1989.

Michael D. McCartney '70 and wife, Rosalie, are proud to announce the birth of John Patrick McCartney, born on October 22, 1988.

Ann Louise Reganis '70 and husband, John Joseph Rebar, are pleased to announce the birth of their "Christmas Baby," Emily Kathryn Reganis Rebar, on December 6, 1988.

Lynne Winter Bisset '73 and husband, John, announce the birth of their second son, Justin Christopher Bisset, on June 23, 1988.

Gail Brounce Sintich '74 and husband, Dave, are pleased to once again announce the birth of a child, Elizabeth Jean Sintich, born on October 19, 1988.

Charles Barr '75 is pleased to announce the arrival of his second child, Ian Charles Barr, born on June 13, 1989.

Jay Endres, M.D., '75 and Nancy (Jacobs) '75 are pleased to announce the birth of their fourth daughter, Robin Michelle Endres, born on November 24, 1988.

C. Ellen (Valentine) Kamen '75 is proud to announce the arrival of her new son, Zachary Louis Kamen, born on April 26, 1989.

Proud parents **Richard C. Balch '76** and wife Ruthanne, were blessed with a baby girl, Kimberly Anne Balch, on April 9, 1989.

Carolyn Edwards Tardif '76 and husband Joseph, are proud to announce the birth of their first child, a son, Thomas Quinn Tardif, on August 4, 1989.

Wendy Hill Willey '76 and husband Paul are pleased to announce the birth of a daughter, Kristin Lorraine on March 24, 1989. The couple resides in Newtown Square, PA.

Adam Reifers Graybeal was born on November 3, 1988, to **John and Barbara Graybeal '77-'78**.

Kim Heath Maney '78 and husband, Kenneth, of State College, PA, are proud to announce the birth of Elle Marie Maney on April 1, 1989.

Ronald L. and Nora L. Fugate '79-'79 are please to announce the birth of their first child, James Isaac Fugate, on March 9, 1989.

Kimberly Marie Kern was born as the first child on June 15, 1989, to **Janet Valentine Kern '79**.

Mark and Mary Righter '80-'80 are pleased to announce the birth of their second child, Greta Bishop Righter, on June 25, 1989.

Dave and Tricia Thompson Robison '79-'80 are the proud parents of a baby girl, Elizabeth Clair Robison, born on June 27, 1989.

Adam Robert Klepfer was born on September 18, 1989, to **Douglas and Sharon Klepfer '81-'82**.

Lisa and Jeff Miles '82-'82 are proud to announce the birth of their new baby girl, Linda Anne Miles, on May 3, 1989.

Eric Jonathan Whetstone was born on June 5, 1989 to the proud parents **Bonny (Greenwalt) Whetstone '82** and husband, Jonathan.

Joseph L. Sloan '81 and wife, **Ellen '83**, would like to announce the birth of their first child, **John Richard Sloan**, on July 13, 1988.

Michael and Jacqueline White '82-'83 are tickled to announce the birth of their second child, Matthew Vincent White, on June 9, 1989.

Brian and Heather MacCrindle-Zimmerman '83-'83 are happy to announce the birth of their son, Andrew MacCrindle Zimmerman, on January 29, 1989.

Randy and Roxann Deike '88-'84 are proud to announce the birth of Andrew Carl Deike on August 31, 1989.

Barry D and Susan (Ferguson) Miller '84-'85 announce the birth of their daughter Jessica Renee Miller, on July 18, 1989.

Lori A. Havice-Vogt '85 and husband, Todd, proudly announce the birth of Natalie Jane Vogt on July 29, 1989.

Steven Andrew Carr, Jr. is the first child born to **Steven Carr '86** and wife, Michelle, on May 16, 1989.

Dennis Mehigan '87 and wife, Tammy, would like to announce the birth of their twin sons, Colin and Shane Mehigan, on August 1, 1989.

Board Adopts Priorities Document

The Juniata College Board of Trustees recently adopted the priorities document submitted as a major component in the strategic planning process at Juniata. The document, as accepted by the Board, reads as follows:

JUNIATA COLLEGE PRIORITIES

First-and-foremost, Juniata is committed to student-centered outcomes as reflected in our Mission Statement. We plan to enhance our position as a leading college in advancing student-centered outcomes. This aspiration holds major implications for all facets of the college and distinguishes us from those colleges and universities pursuing a "reputation-resource" path to excellence.

Commitment to student-centered outcomes has been the centerpiece of our culture in the past and will continue to hold the most prominent position in our educational plans for the future. These outcomes are developed in both a disciplinary and an interdisciplinary context. Our mission — promoting growth and education in our students — demands strength across the curriculum and a continuing emphasis on expanding the student's base of knowledge. This is a mission to which all faculty and staff can and do contribute.

The outcomes we desire are derived from the Mission Statement and encompass education of the whole person. They are organized around: *skills* (read with insight, use language clearly and effectively, think analytically, understand methods and purposes of academic inquiry, and express creativity); *appreciations* (of cultural heritage, and understand methods and purposes of diverse areas of academic inquiry); and *values* (mutual support, free exchange of ideas, active pursuit of both cooperative and individual achievement, capacity to deal with diversity, intellectual, spiritual, aesthetic and moral).

As we work towards these outcomes, the following priorities emerge:

1. Enhance the role of the humanities.
2. Strengthen programs in the fine and performing arts and in communications.
3. Maintain Juniata's traditional strength in the natural sciences.
4. Maintain strong programs in the social sciences.
5. Enhance the role of the Baker Institute of Peace and Conflict Studies.

Two broad-based priorities define our college-wide approach to student-centered outcomes both in and beyond the classroom. The first priority is to provide an education within a global context by enhancing the international dimension of the college. The second priority is to strengthen a sense of community which fosters whole person education across all disciplines and in all aspects of college life.

Strategic planning is a process constantly in flux as it responds to shifting environmental and internal conditions. The priorities identified above are supported by work which was launched in January, 1987, when the Mission Statement, External Assessment and Internal Assessment Committees were formed. Nonetheless, these priorities are subject to review and changes which would allow us to accomplish our mission more effectively.
